### General

The Canadian Nuclear Society will host its 40th Annual Conference from June 6 to 9, 2021. This conference provides a forum for communicating progress, achievements and new ideas across a broad range of nuclear technology areas. Topics of interest are listed on the following page. Out of an abundance of caution in view of the COVID-19 situation, the conference will be held virtually.

The conference will feature:

- Plenary sessions with invited speakers, addressing significant industry developments;
- An embedded Symposium on Small Modular Reactors addressing all aspects of this emerging technology;
- Technical sessions (see list of technical topics [here](#)) with subject-matter experts from utilities, suppliers, the regulator, academia, federal laboratories and agencies to present the latest advancements in nuclear science and technology;
- Exhibits with industrial leaders showcasing their latest nuclear products and technology.
- A Student Conference with student posters.
- Social (virtual) features that facilitate discussions and networking on subjects of common interests.

### Program

Program details will be coming soon!
