Data Migration International - Tenthpin Life Sciences Solution Bundle

LESS COMPLEXITY AND MORE VALUE – MIGRATE TO SAP S/4HANA WITH JiVS AND TENTHPIN

Digital transformation in the life sciences industry presents unique challenges. Cost and pricing pressures, increasingly demanding healthcare agendas and changing regulatory requirements all add up to a fast-changing and complex environment. This is where Tenthpin and Data Migration International come in. Our unique understanding of the industry and combined technical expertise can help drive your business transformation forward.

The JiVS Information Management Platform and Tenthpin's consulting services combine transformative technology with industry expertise to ease your transition to SAP S/4HANA. No matter how complex your IT landscape – or how tight your timeline and budget – our joint offering will simplify and accelerate the journey.

The unique selling point of our data migration approach is the separation of historical data from operational data. This dramatically reduces the volume of information transferred to the new IT environment and significantly improves data quality. With all legacy information managed securely in the JiVS platform, companies can easily access historical data for as long as their business or regulations require – and finally retire costly outdated systems.

Our value proposition:

- Simplify and accelerate your transformation to SAP S/4HANA
- Decrease the volume of data migrated and increase quality
- Access historical data seamlessly from any interface
- Reduce TCO for SAP S/4HANA by 25%
- Cut data migration effort by 50%
- Lower operational costs by up to 80%
- Leverage the life sciences expertise of a highly experienced consulting team

About Data Migration International:

Data Migration International has been a leading specialist in system decommissioning for more than 20 years. Its flagship product, the JiVS Information Management Platform (IMP), manages the entire lifecycle of corporate data independently of existing systems and applications. JiVS IMP enables customers to reduce operational costs by 80%, and system migration effort by 50%, while guaranteeing 100% compliance and access to information. Numerous customers like ABB, AB InBev, Alstom, RUAG, AXA, General Electric, Commerzbank and SBB benefit from JiVS IMP's cost efficiency, flexibility and agility.
