 - ▶ Topics by: Dinis Cruz, Ivan Ristic, Brian Chess, pdp, ... and many more

Agenda

- Introduction
- OWASP Update
- **Poll 2007**
- BeLux Chapter

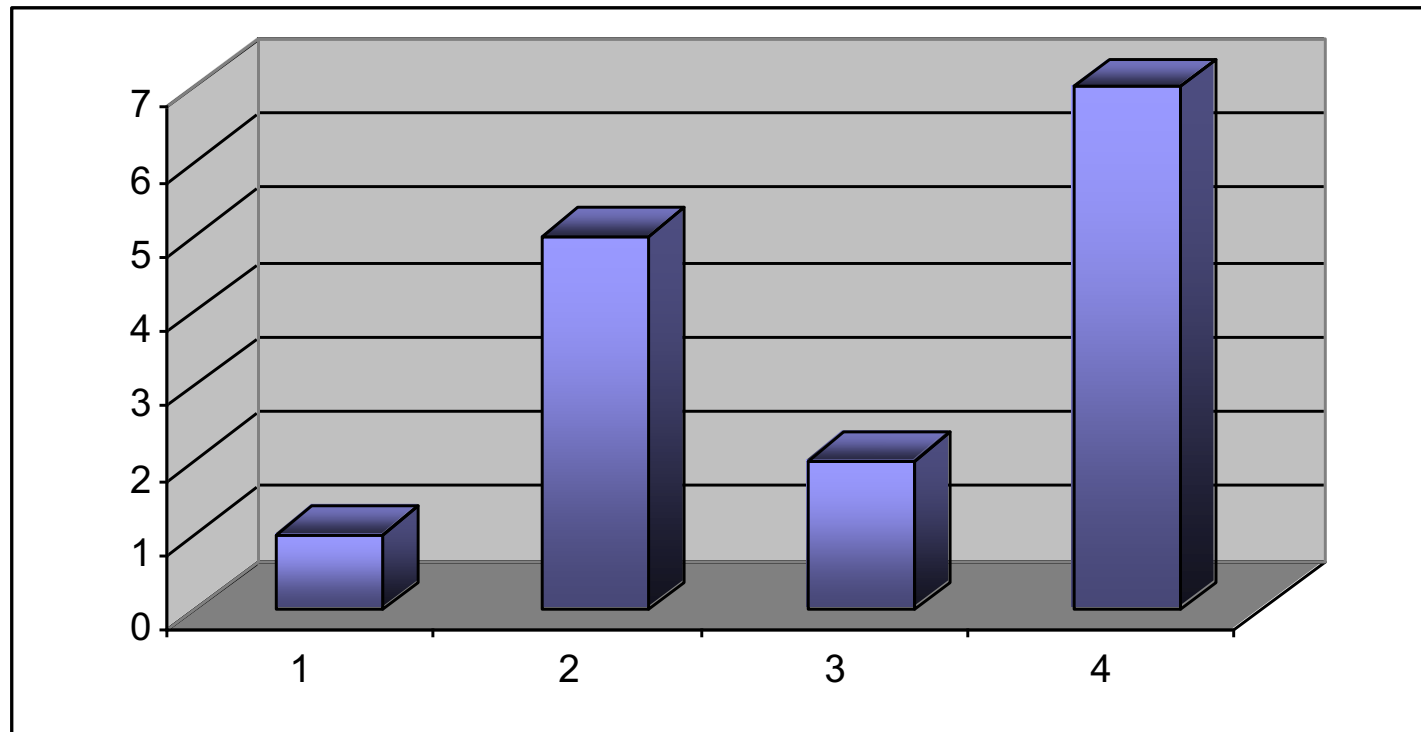

Q1: Do you consider yourself:

- a) "New to beginner" on (Web)AppSec topics
- b) "Having some knowledge-experience" on (Web)AppSec topics
- c) "Advanced to expert" on (Web)AppSec topics

Q2: How many chapter meetings would you like to attend in 2008:

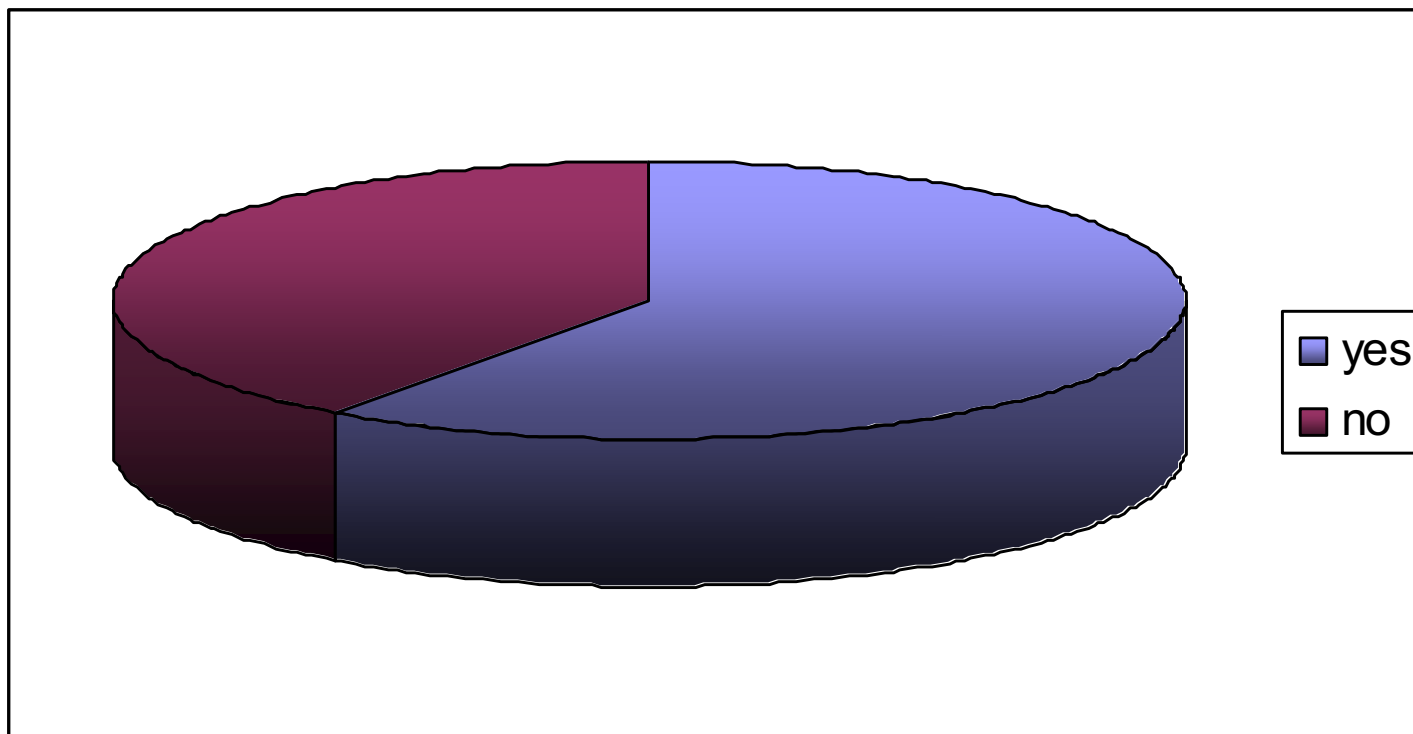

- a) 1
- b) 2
- c) 3
- d) 4

Q3: Will you come to the OWASP AppSec EU conference in Brussels on May 22-23?

a) yes

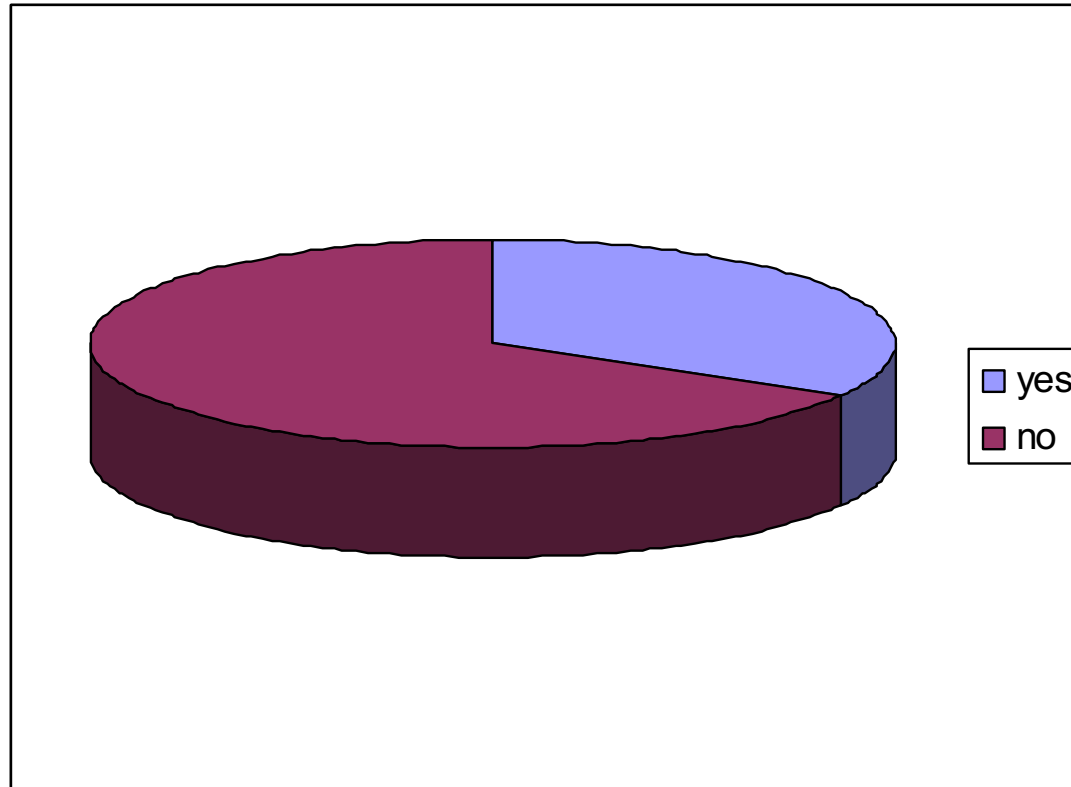

b) no

Q4: If given some time to prepare a topic, would you consider preparing a session for a chapter meeting:

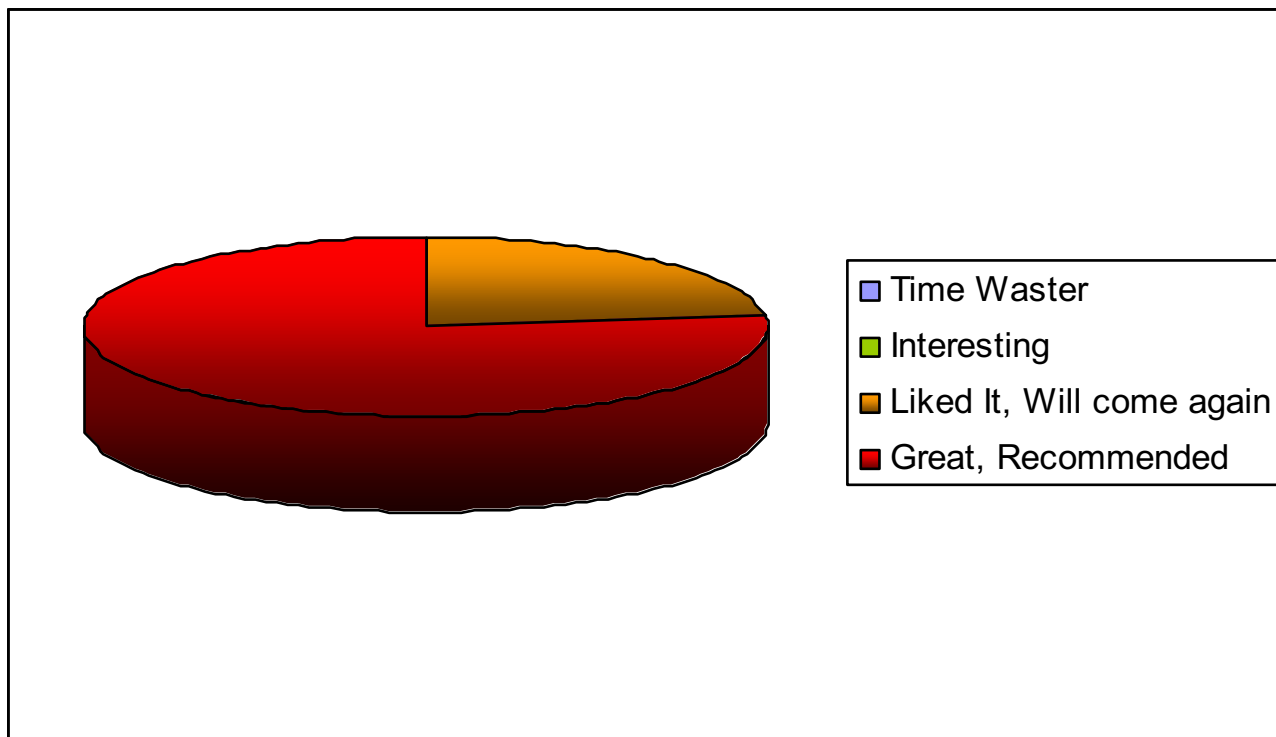

a) yes

b) no

Q4: What is your opinion of the 2007 Owasp events?

- a) A waste of time
- b) Somewhat interesting, but I will not come anymore
- c) I liked it, and will maybe come to some chapter meetings next year
- d) Great! I would recommend it to everybody implicated or interested in (Web)AppSec

Q5: What would you recommend to make our chapter meetings more interesting for you?

- It's yet very very interesting... i know that's not really webappsec but info about trojan/BHL object etc...
- I just need to find the time to come.
- Meetings in the centrum of **Brussels**?
- On many of the previous meetings, the discussions with the speaker and the audience, or even between various members in the audience were very interesting. Every **feedback** from the audience, positive or negative towards the subject, is most **valuable**.
- You need to stay on a more **technical level**, otherwise too much overlap with other organisations such as ISACA, ISSA, LSEC, Belcliv/Clusib
- Schedule them when I am available to attend (missed out on a couple of very interesting meetings last year :-()
- Brand new! Didn't go to a chapter meeting yet, so it's hard to give my opinion about that! But **I heard good things about it**, that's the reason why I joined the chapter.
- Looking at presentation from other countries I would like to have an overview of new topics and maybe some **speakers coming over**?
- Most thinks were interesting, **real life case studies** are the most interesting: what worked (not), constraints in practice. Defense strategies as opposed to attack scenarios. What about client security (flash, pdf, browser) ?
- You are doing **great**.

Agenda

- Introduction
- OWASP Update
- Poll 2007
- **BeLux Chapter**
