OWASP MEMBERSHIPS

global strategic group

Software powers the world, but insecure software threatens safety, trust, and economic growth. The Open Web Application Security Project (OWASP) is dedicated to making application security visible by empowering individuals and organizations to make informed decisions about true application security risks.

OWASP boasts 46,000+ participants, more than 65 organizational supporters, and even more academic supporters.

As a 501(c)(3) not-for-profit worldwide charitable organization, OWASP does not endorse or recommend commercial products or services. Instead, we allow our community to remain vendor neutral with the collective wisdom of the best individual minds in application security worldwide. This simple rule is the key to our success since 2001.

Your individual and corporate membership powers the organization and helps us [serve the mission](#). Please consider becoming an OWASP member today!

Security Project

The OWASP Cloud Security Project

The rise of DevOps and cloud computing has given organisations unprecedented access to feature-rich and high-scalable elastic platforms that allow them to deliver products and services with a velocity and agility that has never been seen before.

But with new capabilities come new attack vectors. The OWASP Cloud Security project aims to help people secure

What is OWASP Cloud Security Project?

The OWASP Cloud Security project aims to help people secure their products and services running in the cloud by providing a set of easy to use
