Project Code: DPR00002
Project Name: Privacy Protections
Prepared for: Sean Vitka
Interviews: 800
Field Period: December 05, 2023 – December 07, 2023
Project Manager: Caitlin Collins caitlin.collins@yougov.com
=====

YouGov interviewed 865 respondents, who were then matched down to a sample of 800 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, and education. The sampling frame is a politically representative 'modeled frame' of US adults, based upon the American Community Survey (ACS) public use microdata file, public voter file records, the 2020 Current Population Survey (CPS) Voting and Registration supplements, the 2020 National Election Pool (NEP) exit poll, and the 2020 CES surveys, including demographics and 2020 presidential vote.

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, years of education, and region. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles.

The weights were then post-stratified on 2020 presidential vote choice, a two-way stratification of race (4-categories) and education (4-categories), as well as a four-way stratification of gender, age (4-categories), race (4-categories), and education (4-categories) to produce the final weight.
