<sup>1</sup>Marginality factor. The symbol “+” means that the species was found in locations with higher values than average. The symbol “-” means the reverse. The greater the number of symbols, the higher the correlation; 0 indicates weak correlation. <sup>2</sup>Specialization factor. The symbol “\*” means the species was found occupying a narrower range of values than available. The greater the number of asterisks, the narrower the range; 0 indicates a very low specialization.
