Safe Harbor Statement

We may make forward-looking statements regarding planned or future development efforts for our existing or new products and services and statements regarding our strategic priorities. These statements are not intended to be a promise or guarantee of business results, future availability of products, services or features but merely reflect our current plans and are based on factors currently known to us. These planned and future development efforts may change without notice. Purchasing and investment decisions should not be made based upon reliance on these statements.

A discussion of factors that may affect future results is contained in our most recent Form 10-K and Form 10-Q filings available at www.sec.gov, including descriptions of the risk factors that may impact us and the forward-looking statements made in these presentations. Autodesk assumes no obligation to update these forward-looking statements to reflect events that occur or circumstances that exist or change after the date on which they were made. If this presentation is reviewed after the date the statements are made, these statements may no longer contain current or accurate information.

This presentation also contains information, opinions and data supplied by third parties and Autodesk assumes no responsibility for the accuracy or completeness of such information, opinions or data, and shall not be liable for any decisions made based upon reliance on any such information, opinions or data.

Autodesk's partners frequently compete against each other in the marketplace, and it is critically important that all participants in this meeting observe all requirements of antitrust laws and other laws regarding unfair competition. Autodesk's long insistence upon full compliance with all legal requirements in the antitrust field has not been based solely on the desire to stay within the bounds of the law, but also on the conviction that the preservation of a free and vigorous competitive economy is essential to the welfare of our business and that of our partners, the markets they serve, and the countries in which they operate. It is against the policy of Autodesk to sponsor, encourage or tolerate any discussion or communication among any of its partners concerning past, present or future prices, pricing policies, bids, discounts, promotions, terms or conditions of sale, choice of customers, territorial markets, quotas, inventory, allocation of markets, products or services, boycotts and refusals to deal, or any proprietary or confidential information. Communication of this type should not occur, whether written, oral, formal, informal, or "off the record." All discussion at this meeting should be strictly limited to presentation topics.

PLEASE NOTE: Do Not Copy, Post or Distribute without expressed permission.

A close-up, black and white photograph of a woven mesh or fabric texture, showing a grid of small, rounded, interconnected elements. The texture is slightly out of focus in the background, creating a sense of depth. The image is partially obscured by a black diagonal shape that serves as a background for the text.

About buildingSMART

And what is an IFC?

Autodesk and buildingSMART International

- 1994 – Autodesk creates the Industry Alliance for Interoperability
- 1996 – renamed as International Alliance for Interoperability (IAI)
- 1997 – IFC 1.0 released
- 1999 – IFC 2.0 released
- 2003 – IFC 2x2 released
- 2005 – IAI renamed buildingSMART
- 2005 – IFC 2x3 released
- 2013 – IFC 4 released
- 2018 – IFC 4.1 (alignment) released
- 2022 – IFC 4.3 released

What is an IFC?

IFC = Industry Foundation Class

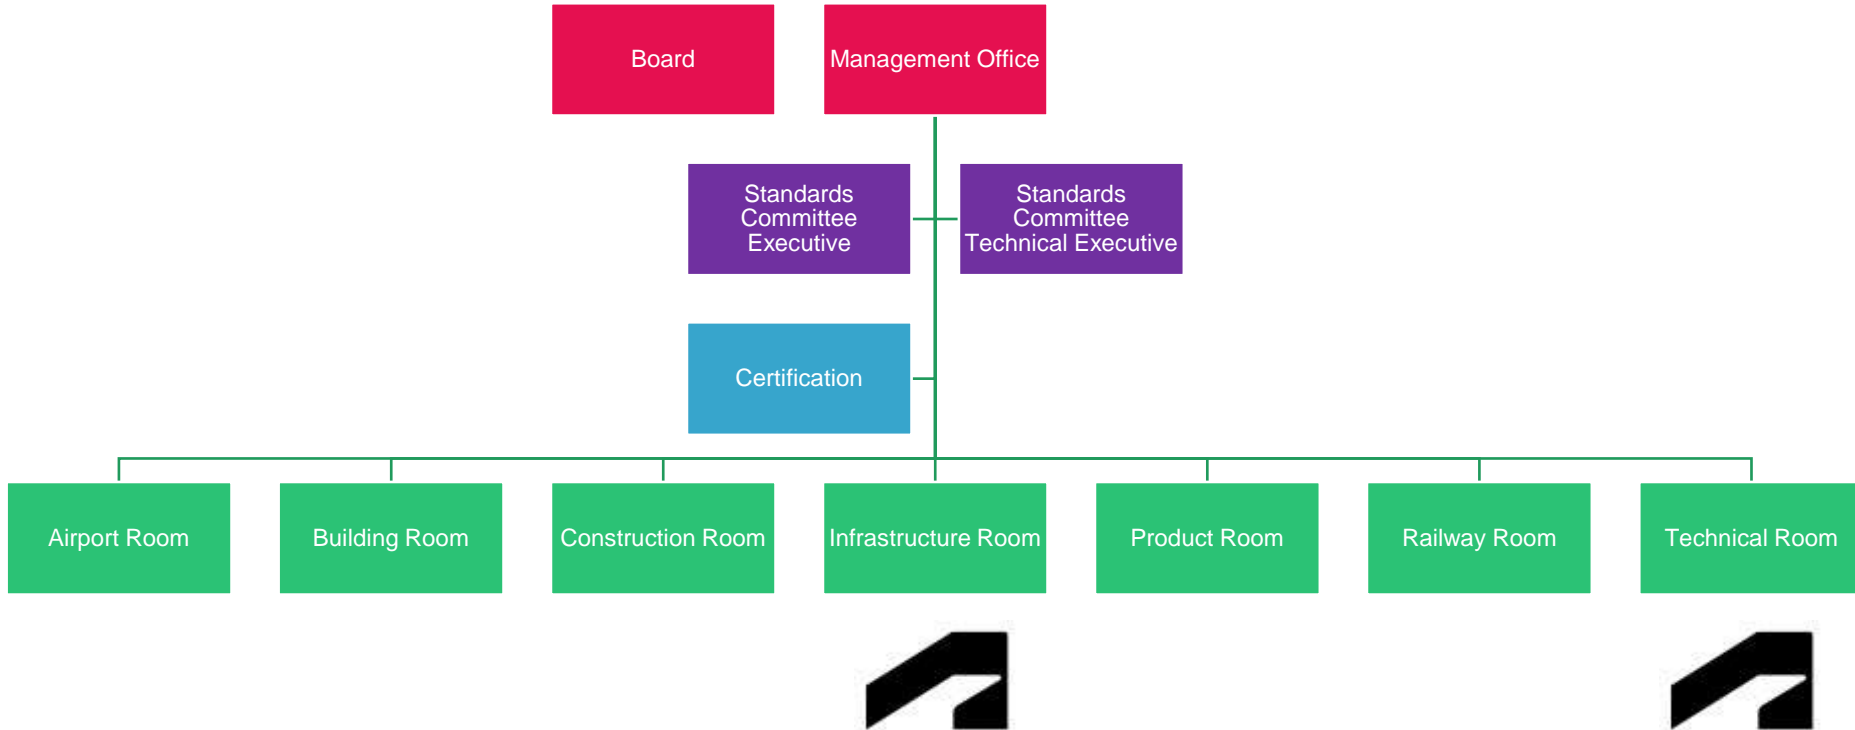

What is IFC? <https://youtu.be/9YgXXbdohOQ>

- an object-based data model for AEC data
- an open file format specification
- managed by buildingSMART International and its members
- 3 components for a valid IFC file: IFC Schema, IFC version, specified Model View Definition (MVD)

```
⊖ MarineFacility : #24= IFCMARINEFACILITY('3$5w3Zy350we3TL1yH_jcd',$,'Sydney Ferries',$,$,#28,$,$,$,NOTDEFINED);
⊖ ReferencesElements : #76= IFCFACILITYPART('2rZAYplcf7Hu4GBw_FfuTH',$,'Circular Quay',$,$,#77,$,$,$,IFCMARINEPARTTYPEENUM(.BERTHINGSTRUCTURE.),NOTDEFIN
  ⊖ Placement : #77= IFCLOCALPLACEMENT(#46,#5);
  ⊖ Decomposes : #43= IFCFACILITY('3qeyM8bFXEhx3chC2j5L4z',$,'Circular Quay Interchange',$,$,#46,$,$,$);
    HasAssociations : #78= IFCCLASSIFICATIONREFERENCE($,'En_80_70','Marine and waterways transport entities','#73,$,$);
⊖ Placement : #28= IFCLOCALPLACEMENT(#23,#5);
  HasAssociations : #55= IFCCLASSIFICATIONREFERENCE($,'Co_80_70','Marine and waterways transport complexes','#51,$,$);
```

- uses an ASCII (human readable) file format
- an official International Standard ISO 16739-1:2018

InfraRoom Mission & Scope

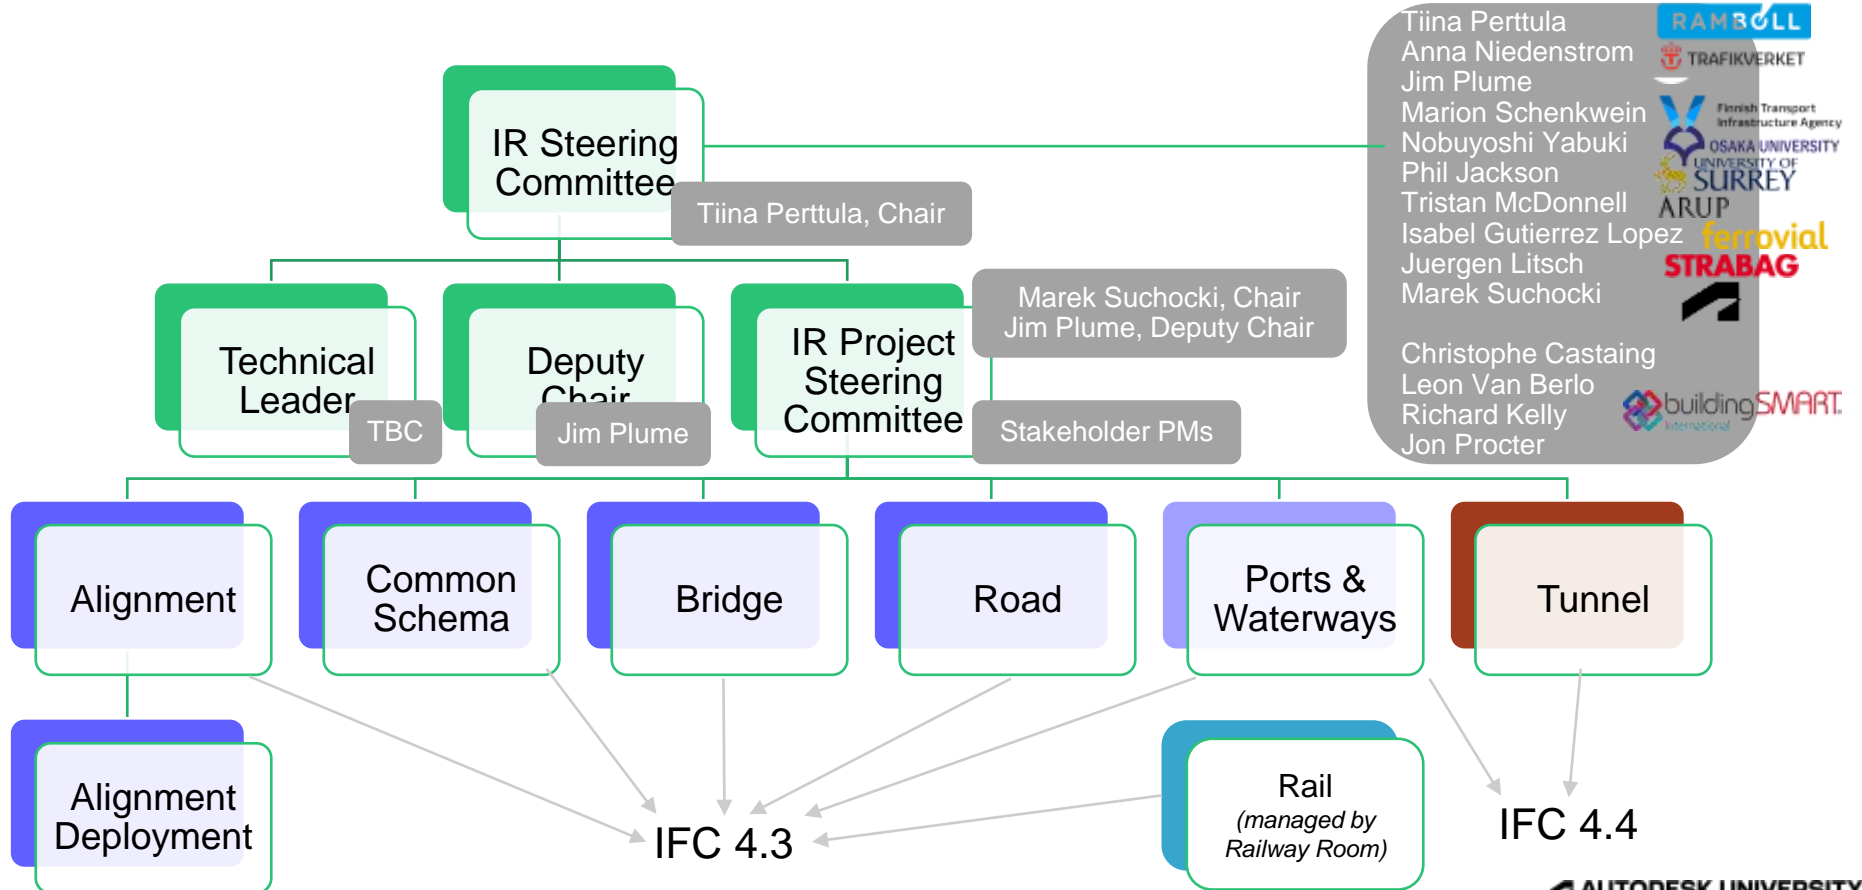

Established in 2013 to address lack of infrastructure support in IFC data model

Mission: To combine, enhance and develop open standards for intelligent data, which enable process and data integration for Infrastructure

Scope: Information exchange and process standards to support effective management of constructed built environment & linking and integrating across BIM and GIS.

Infrastructure Room

Members of the Infrastructure Room:

- Tiina Pertulla
- Anna Niedenstrom
- Jim Plume
- Marion Schenkwein
- Nobuyoshi Yabuki
- Phil Jackson
- Tristan McDonnell
- Isabel Gutierrez Lopez
- Juergen Litsch
- Marek Suchocki
- Christophe Castaing
- Leon Van Berlo
- Richard Kelly
- Jon Procter

Partners and Affiliates:

- RAMBOLL
- TRAFIKVERKET
- Finish Transport Infrastructure Agency
- OSAKA UNIVERSITY
- UNIVERSITY OF SURREY
- ARUP
- ferrovial
- STRABAG
- buildingSMART International

BANE NOR

Example infrastructure Model View Definitions (MVD)

Reference View

BRep geometry

Component placement in project coordinate system (XYZ)

→ *coordinate-based approach*

Leverage new IFC classes e.g. *IfcBridge*, *IfcBridgePart*, *IfcBearing*

Alignment-based Reference View

BRep geometry

Component Placement relative to a given *IfcAlignment* curve

→ *alignment-based approach*

Leverage new IFC classes e.g. *IfcBridge*, *IfcBridgePart*, *IfcBearing*, *IfcSectionedSolidHorizontal*, ... + ***IfcAlignment***

IFC 4.3 MVD for Certification

- The project provides the following base MVDs:
 - Reference View
 - Alignment Based Reference View
 - Design Transfer View
 - Other custom Views
- Will provide necessary information to start software certification through MVDs
 - Formal software certifications are expected *to commence* in Q3 2022
- Work undertaken in collaboration with AASHTO, who will include an IFC 4.3 Bridge MVD as handover specification to US supply chain

A close-up, black and white photograph of a woven mesh or fabric texture, showing a grid of small, rounded, interlocking elements. The texture is slightly out of focus in the background, creating a sense of depth. This image occupies the left and top portions of the slide, partially overlapping the black background.

How does Autodesk support IFC today?

Current product IFC implementations

Autodesk IFC Support

Support for IFC 2.3 in 14 Autodesk solutions.

IFC2x3

IFC4

IFC4.1 Alignment

IFC Vision | Concepts

CONSISTENT

Geometries and properties are consistently authored and consumed when exchanging data between partners utilizing IFC formats with high fidelity.

PERFORMANT

The time experienced for reading and authoring data exchanged via IFC is reasonable.

FLEXIBLE

Supports unique project requirements and goals through flexibility in how data is defined and understood when exchanged via IFC.

IFC Certified Versions in Autodesk Products

Reference View 1.2 export: Architecture/Structure/MEP
Reference View 1.2 import: in progress

incorporates several extensions of IFC in building, building services and structural areas, enhancements of geometry and other resource components, and numerous quality improvements.

Coordination View 2.0 export: Architecture/Structure/MEP
Coordination View 2.0 import

most commonly used format at the moment and supported by most BIM applications

older format still supported in Revit, only recommended in the recipient's software doesn't support IFC 2x3

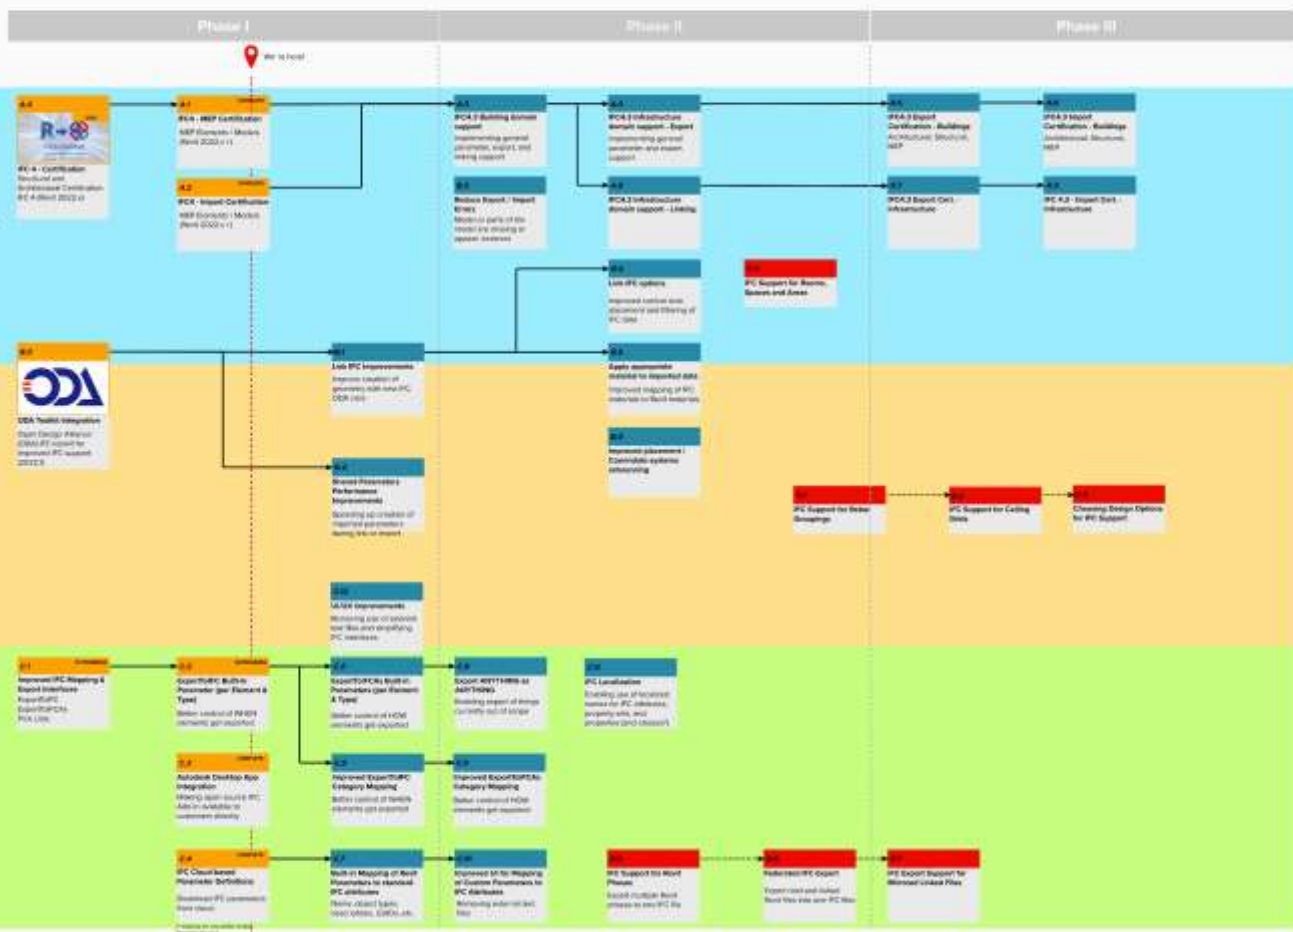

A close-up, black and white photograph of a metal mesh or woven fabric texture, showing a grid of rounded, interconnected elements. The image is partially obscured by a black diagonal shape that serves as a background for the text.

Revit IFC Roadmap

Recent and Planned

REVIT + IFC VISION MAP

An outline for the development of IFC functionality in the Revit platform, including improvements to existing features, introduction of new functionality, and enhancements to user experience and interface aspects

DRAFT

Ultimate IFC Experience

Objective

Position Autodesk Revit as First-in-Class Desktop BIM Application for IFC Interoperability

CONSISTENT

Geometries & Properties will be consistently authored and consumed when exchanging data between partners utilizing IFC formats in the design of buildings and infrastructures.

PERFORMANT

The time experienced for loading and authoring data exchanged via IFC is reasonable.

FLEXIBLE

Work can be completed in a meaningful manner which supports unique project requirements and gains through flexibility in how data is defined and understood when exchanged via IFC.

Office
ms

For Structural Engineering

- Structural loads enhancements
👍 26
- Structural loads combinations automation
👍 20
- Analytical panels modeling through extrusions
👍 16
- Generic Bar Bending Details in Rebar Schedules
👍 89

For Systems Engineering

- Energy & Mechanical Systems Analysis - Analytical Model Improvements
👍 6
- Energy and Mechanical Systems Analysis - Easier Analytical Model Workflow Navigation
👍 33
- Energy and Mechanical Systems Analysis in the Cloud (Next Gen Insight)
👍 37

For Working Together

- ISO 19650 Compliance Support
👍 136
- Cloud Worksharing: Initiate/Link API
👍 33
- Cloud Worksharing: Publish Nested Links
👍 77
- Cloud Worksharing: Manage Cache Size + Location
👍 88
- Cloud Worksharing: FedRAMP Support
👍 21

For IFC

- IFC4 - Import (Linking) Certification
👍 19
- IFC4.3 Linking Support
👍 14
- Consistent GUIDs on IFC Export
👍 23
- Export Material Properties to IFC
👍 22
- Cloud-based IFC Parameter Definitions
👍 14
- Options for Federated IFC Export
👍 25
- Category Mapping Improvements

For Generative & Computational Design

- External content
👍 5
- Trust Warnings for Dynamo and Player
👍 5
- More File Locations stored in settings.

Autodesk IFC investments

Autodesk joined the Open Design Alliance in 2020 and will adopt their IFC software development kit, beginning with integration into Revit.

Early adoption of ODA SDK

Revit ODA implementation

Beta example of IFC 4.3 import

IFC 4.3 for Civil 3D

Delivering IFC for infrastructure

IFC 4.3 Plugin for Civil 3D

- New Plugin for IFC workflows in Civil 3D
- Supports Multiple IFC Formats
 - Import of IFC 2x, 4, 4x1, 4x2 and 4x3
 - Export of IFC 4 Reference Views and IFC 4x3
- Supports Object to IFC Entity and Type Mapping
- Supports MetaDATA to IFC Property Mapping
- Supports Sectional Swept Solids and Fallback BREP Geometry

IFC 4.3 Plugin for Civil 3D Geometry

- Data is exported relative to a local datum
- Civil 3D COGO Points / Point Groups, Feature Lines, Surfaces, Alignments, Corridors, Bridges and Pressure and Gravity Pipe Networks are exported, along with AutoCAD solids, polylines and blocks
- This IFC Solution is focusing on 3D Objects
For example, the following are out of scope:
 - 2D CAD entities (Lines, Arc's, Circles etc)
 - Text, Mtext, Tables, Labels etc
 - Paper Space, Cross Sections and Profile Views
 - Assembly Definitions

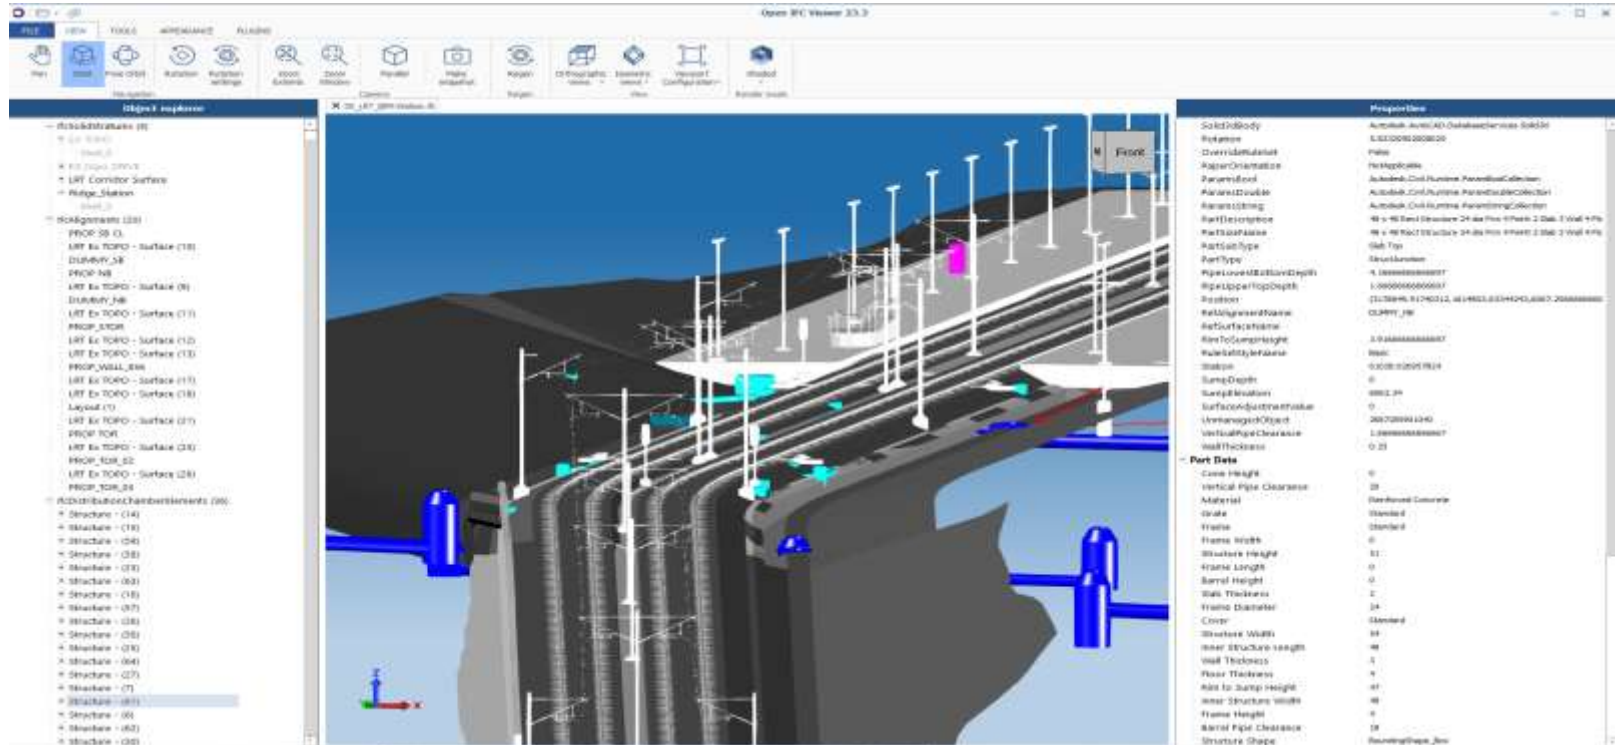

IFC 4.3 Design to Design workflows

- IFC does not support detailed Design to Design workflows
- Parametric or Calculated geometry is exported as solved 3D Objects
- Alignments/Profiles are broken down to solved Curves and Tangents
- Design “Parameters” or “Connections” are not handled by IFC
- A Corridor defined by assemblies is exported as a collection of “solved” cross sections, swept solids, lofted surfaces and feature lines
- The objects used to solve the corridor like assemblies, targeting etc are not part of IFC

IFC 4.3 Plugin for Civil 3D

Support includes Blocks, AutoCAD Solids, Civil 3D COGO Points / Point Groups, Feature Lines, Surfaces, Alignments, Corridors, Bridges and Pressure and Gravity Pipe Networks

IFC 4.3 Plugin for Civil 3D Meta Data

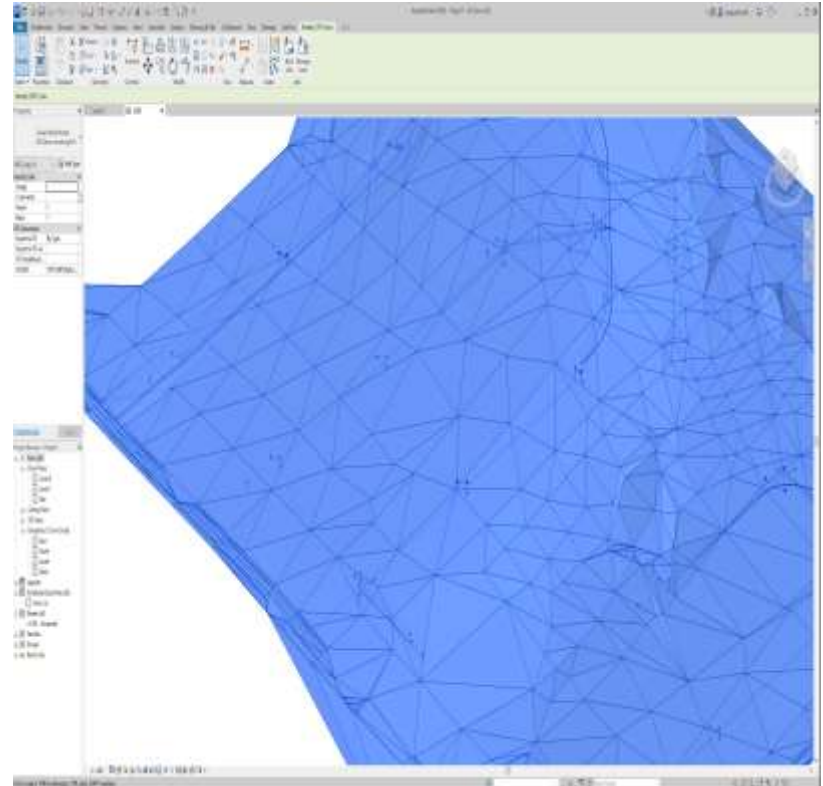

- Exported Objects are Metadata Rich Containing
 - Colors
 - Materials
 - Fixed IFC GUID for Objects Re-Exported
 - Property Set Data
 - UDP (User Defined Parameters)
 - Pipe / Structure / Fitting Part Data
 - Generic Object properties
- Imported Objects bring in all properties as UDP and Property Sets along with the objects IFC GUID

Exchange via IFC from Civil 3D to Revit

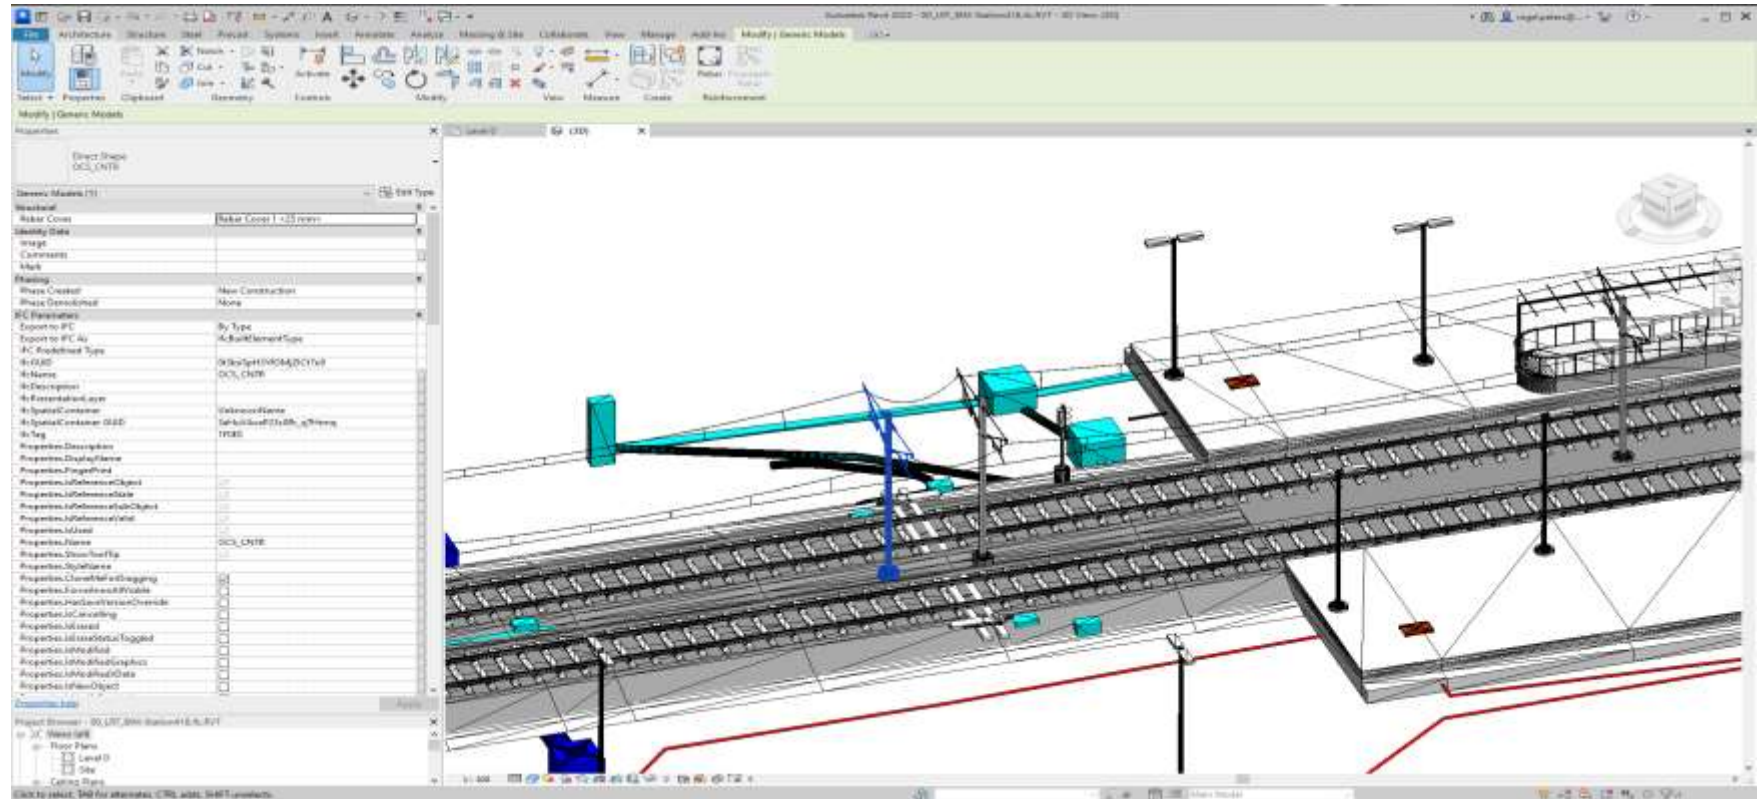

- *Revit Imports the following Objects as Direct Shapes*
 - *Surfaces*
 - *Bridges*
 - *Gravity and Pressure Pipes*
 - *Corridors*
 - *AutoCAD Solids*
 - *Blocks*
- All Objects include Metadata

Civil Rail into Revit via IFC for Stations

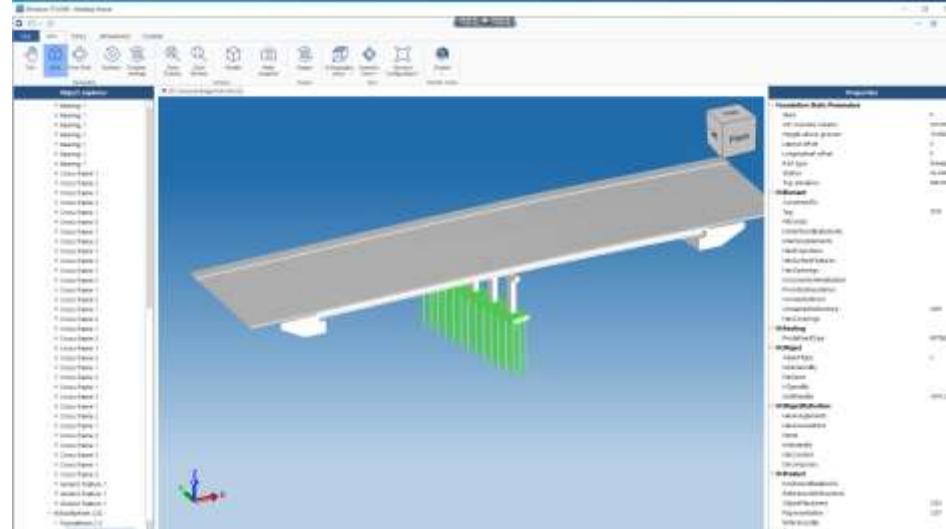

Direct transfer of infrastructure corridors, pipes, surfaces and manholes etc

Importing IFC into Civil 3D

- *IFC Objects That Import as Civil 3D Entities*
 - *Alignments*
 - *Feature Lines*
 - *Surfaces*
 - *Sites*
 - *CoGo Points / Point Groups*
 - *PolyLines*
- All other objects import as AutoCAD Solids
- All Objects include Metadata

Summary and what's next

This is the beginning of our continuing mission

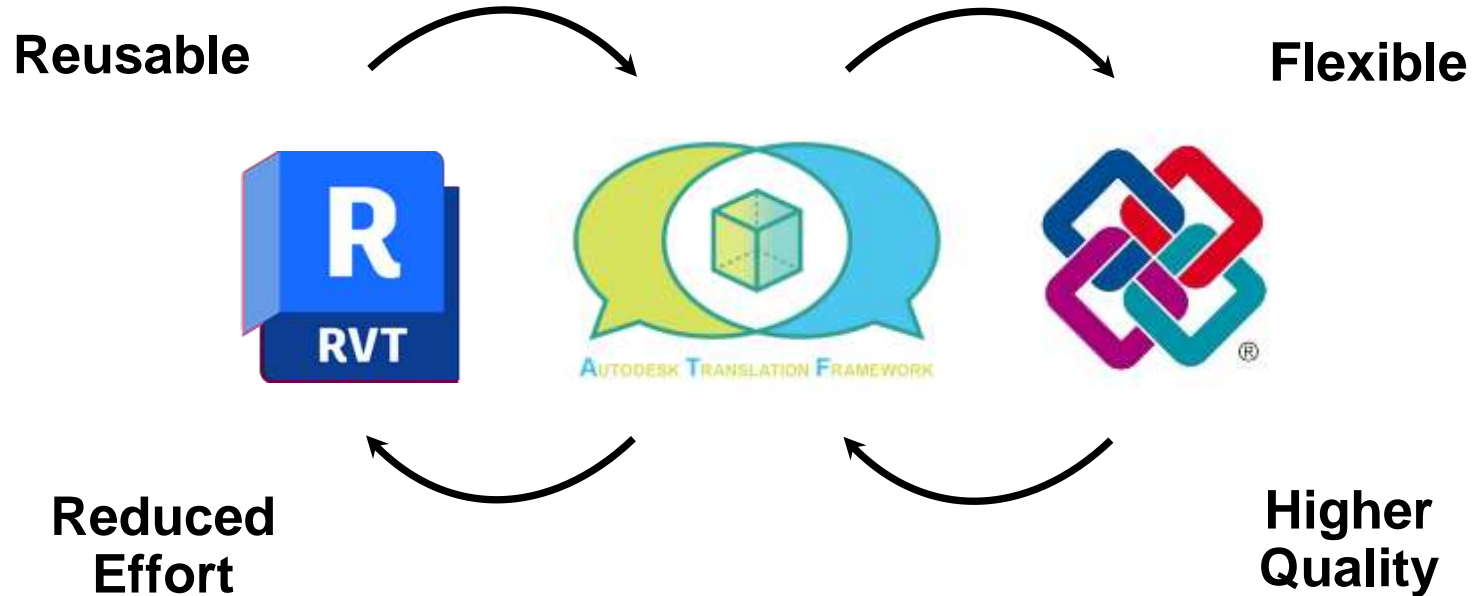

What can you benefit from now?

Boldly go in using IFC in projects and for handover

- IFC 4.3 has been released and will become an ISO standard update in 2023
- buildingSMART is continuing to extend IFC for infrastructure support with Tunnel and new Marine extensions in progress, as well as other investments e.g. BSDD, IDS and IFC 5
- Public and private sector owners are expected to specify IFC 4.3 in contracts soon
- Autodesk solutions will offer IFC support to meet new requirements
 - Revit has enhanced support for IFC including 4.3 import, in current release
 - Civil 3D IFC 4.3 plugin is available via *manage.autodesk.com*
 - All pre-existing support for IFC is still available in products
- Autodesk are awaiting for buildingSMART to make IFC 4.3 certification available

ATF and IFC

Continuing mission to extend consistent IFC support across our products
