Equations (1) and (2) should be replaced by

$$\sigma_A^2 = \sigma^2 \left(1 - \frac{L}{l_{\text{cor}}} + \frac{L^3}{5 l_{\text{cor}}^3} \right) \quad \text{if } L < l_{\text{cor}} \tag{1}$$

and

$$\sigma_A^2 = \frac{\sigma^2 l_{\text{cor}}^2}{5 L^2} \quad \text{if } L > l_{\text{cor}}. \tag{2}$$

The correct versions of these equations were used to perform the analysis. Thus the results and figures of the article are unaffected by this corrigendum.
