

2023 App Store Transparency Report

Since it launched in 2008, the App Store has proven to be a safe and trusted place to discover and download apps. At Apple, we're committed to creating a great experience for customers and developers — and we review every app for compliance with our App Review Guidelines to uphold the highest privacy, security, and content standards.

Our App Store Transparency Report provides data about how we operate the App Store in all 175 countries and regions where it's available. Below you'll find information about our efforts to help keep the App Store a safe and trusted place for users to find apps they love. This report covers data from 2023. The 2022 report is available [here](#). We will update this information annually.

Apps

Total number of apps on the App Store

1,870,119

App submissions reviewed¹

6,892,500

App submissions rejected

1,763,812

App submission rejections by App Review Guidelines section²

- Safety: 103,629
- Performance: 1,132,613
- Business: 192,884
- Design³: 295,497
- Legal: 420,914
- Other: 40,119

App submissions approved after rejection

277,923

Apps removed from the App Store⁴

116,117

Apps removed from the App Store by app category

Top 10 app categories⁵

1. Games: 17,853

Search

Average weekly number of customer accounts
searching the App Store

398,499,012

Average weekly number of apps appearing in the
top 10 results of at least 1000 searches

166,360

Total number of apps appearing in the top 10 results
of at least 1000 searches

1,268,176

¹²Complete data showing appeals of app removals by country or region is included in the supplemental CSV file, available at apple.com/legal/more-resources. ¹³Most app removals that are appealed are removed from the App Store due to illegality or fraud. Consequently, most appeals from developers of such apps are rejected. ¹⁴Complete data showing restorations after appeals of app removals by country or region is included in the supplemental CSV file, available at apple.com/legal/more-resources. ¹⁵Developers may be terminated from the Apple Developer Program for a number of reasons, the most common of which is when accounts are found to be connected with other terminated developer accounts. ¹⁶Most developer account terminations that are appealed are removed from the App Store due to fraud. Consequently, most appeals from such terminations are rejected. ¹⁷On iPhone and iPad, apps that customers download from the App Store are automatically updated by default.
