REASONS YOU NEED BLACKBERRY UEM TO SECURE YOUR DIGITAL WORKPLACE

If your organization struggles to balance the needs of an increasingly mobile workforce with stringent security and compliance requirements, unified endpoint management (UEM) can help. Keep reading to discover important indicators that your organization would benefit from BlackBerry® UEM.

EMPLOYEES ARE LESS PRODUCTIVE THAN THEY COULD BE

Remote and mobile employees can't work efficiently because they don't have fast, secure, and unencumbered access to enterprise apps.

MISSION-CRITICAL APPS ARE NOT SECURE

If you're relying on legacy solutions like VPNs, your enterprise apps and systems may be vulnerable to inside and outside threats.

ENTERPRISE DATA CAN BE LEAKED OR COMPROMISED

Regardless of device, location, or type of connection, all in-transit and at-rest business data must be secure.

COST-EFFECTIVE AND PRODUCTIVITY-BOOSTING BYOD POLICIES CAN'T BE SUPPORTED

Not all solutions can support "Bring Your Own Device" (BYOD) policies that keep business apps and data private and secure.

MOBILE DEVICES DON'T HAVE ADEQUATE SECURITY OR THREAT DETECTION

Mobile access to enterprise apps must be as secure on public networks as they are in the office.

SECURITY POLICIES CAN'T KEEP UP WITH EVERY POSSIBLE DEPLOYMENT SCENARIO If you can't automatically protect new devices and connections

without manual management, your security is always a step behind.

ENTERPRISE APPS AREN'T AVAILABLE

When remote and mobile access is restricted or constrained, employees can't work productively.

Endpoint solutions that rely on OS-level encryption can't

PERSONAL AND WORK DATA AREN'T SEPARATE

isolate business from personal data or ensure its privacy.

FILE-SHARING PLATFORMS Without a secure way to share externally, employees may turn

EMPLOYEES ARE RESORTING TO CONSUMER-GRADE

to public file-sharing sites that don't meet security standards.

ACHIEVE AND MAINTAIN Expanding access improves productivity, but may present

REGULATORY COMPLIANCE IS DIFFICULT TO

costly compliance challenges if security and auditing controls aren't in place.

ENABLE SECURE PRODUCTIVITY

any device, with confidence that mission-critical apps and data are secure,

If one or more of these statements are true, it's time to consider BlackBerry UEM. BlackBerry UEM offers unparalleled flexibility and security that enables employees to be productive anytime, anywhere, and on practically

uncompromised, and in compliance. For more information or to arrange a demo, visit our website.

**** BlackBerry Intelligent Security. Everywhere.
