Hi Douglas,

Thank you for attending the joint Skopenow and Penlink webinar. We're really glad you had the opportunity to participate as we walked through OSINT techniques and a brief showcase of what we offer.

As a refresher, Skopenow automates OSINT investigations by allowing its users to collect and analyze social media data anonymously.

We're offering all webinar attendees free access to Skopenow for 2 weeks to put your new knowledge to the test. To get started, we'd like to set up a brief intro call to learn more about your team, needs, and current methodologies.

Are you free to connect sometime this week or after the holidays?

Best,
Chris

Skopenow user,

Doubling its user base in just a week, collecting information on Parler has become an essential component to any OSINT investigation.

Defectors of mainstream platforms like Twitter and Facebook are flocking to Parler because of their anti-censorship policies. Unfortunately, platforms like Parler restrict viewer's access to content until registration, making digital investigation more difficult. **There's no need to worry, we've created a 'How-to' guide which will be demonstrated live next week.**
