Subject: ABTShield Pulse reports

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

J0590

Dear ██████,

We have just launched a draft version of the ABTShield Pulse reporting system for you. It is in the „work-in-progress“ stage, that’s why many features do not work (I will come back to the issue later). We also plan to adjust it according to your comments.

Within a few minutes you will receive 3 emails from us. You should get such mails every morning or afternoon or any other agreed time. These mails contain a summary of activity on Twitter related to subjects we previously defined. In every such a mail, there are three modules:

General overview of activity in selected topics

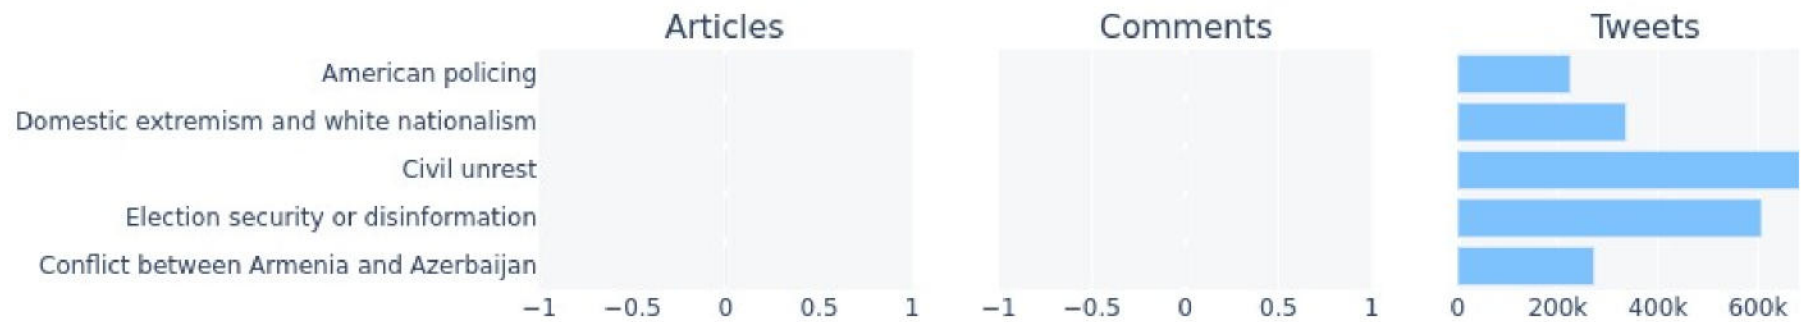

General overview for last 7 days:

| Theme | Tweet count | Tweet reach | Tweet bot alert (%) | Article count | Article reach | Article bot alert (%) | Comment count | Comment reach | Comment count (%) |
|--|-------------|-------------|---------------------|---------------|---------------|-----------------------|---------------|---------------|-------------------|
| American policing | 838 | 224K | N/A | N/A | N/A | N/A | N/A | N/A | N/A |
| Civil unrest | 142 | 709K | N/A | N/A | N/A | N/A | N/A | N/A | N/A |
| Election security or disinformation | 241 | 607K | N/A | N/A | N/A | N/A | N/A | N/A | N/A |
| Conflict between Armenia and Azerbaijan | 496 | 273K | N/A | N/A | N/A | N/A | N/A | N/A | N/A |
| Domestic extremism and white nationalism | 49 | 337K | N/A | N/A | N/A | N/A | N/A | N/A | N/A |

As you can see, in the table we inform you about the number and reach of Tweets in preselected categories. By reaching a total number of people, who could see the message - we add reach of every Tweet and retweet, so one person can see many messages - we calculate total number of contacts. In „tweet count“ we include the number of all retweets of the original message.

In the second module, there is information about reach for every topic in graphic form. Currently only „Tweets“ are collected, but we plan to connect more sources in the near future, such as articles and blogs. This diagram allows you to understand relative popularity and sources of messages for each subject.

Reach:

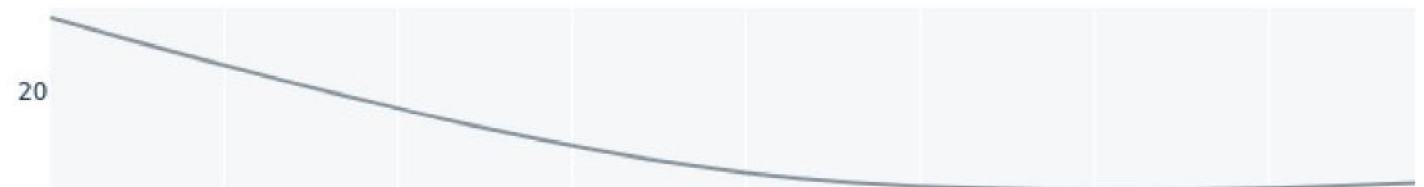

The last part contains the chart with changes of popularity of subjects during the last days (this time we count messages). This should give you an insight of changes in popularity of themes during a longer period of time.

Trend dynamics:

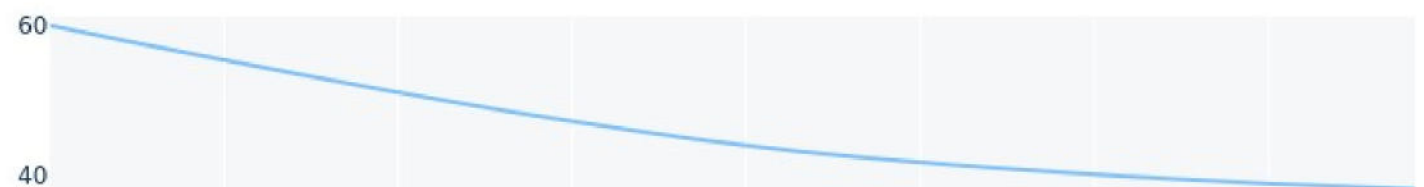

American policing

Domestic extremism and white nationalism

Civil unrest

Election security or disinformation

Conflict between Armenia and Azerbaijan

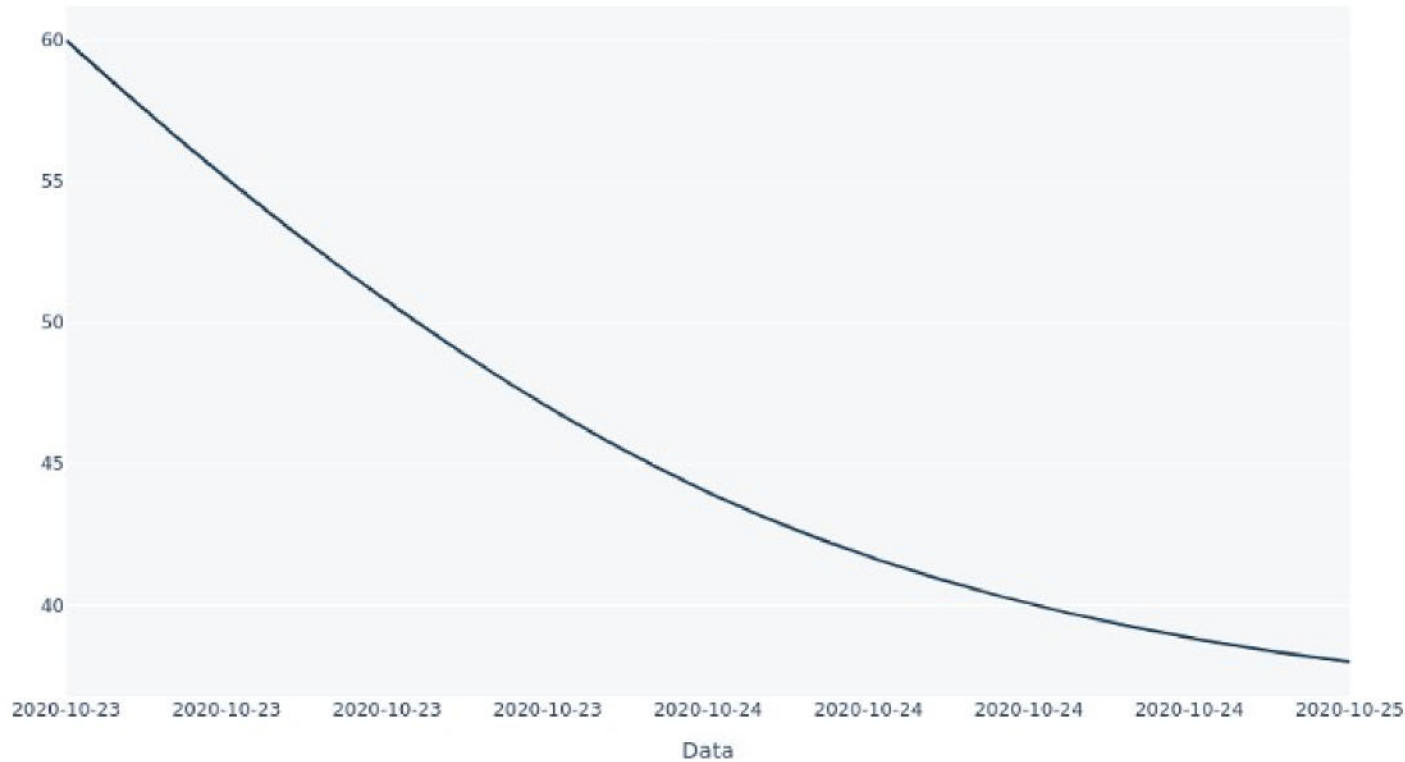

23/10 23/10 23/10 23/10 24/10 24/10 24/10 24/10

These three diagrams should give you some understanding of what is being discussed. More detailed information is given in the attached Excel file. In the spreadsheet, there are five tabs, each dedicated to one of defined subjects. It opens up with two diagrams. The one on the left you have already seen - it

shows the total reach of the subject. The one on the right shows the reach of underlying sub-themes, to give you better understanding what exactly is currently being discussed in the matter. These charts will become more interesting as we collect data over a longer period of time.

Civil unrest: 2020-10-25

Trends in reactions

Tags bre

The section below will contain tweets from a list of Twitter accounts you would like to follow. If you have a list of such accounts, please let us know. Currently there are no tweets, since there is no list yet.

Below, you can see a list of original tweets with the highest reach in the subject. There is a text of each tweet, so you can understand its nature.

As you can see, on the right side, there is a link, you may click to open an original message on Twitter.

At the beginning of the mail, I mentioned that you will get 2 or 3 mails - here is why. We currently collect 3 datasets:

- Dataset with Tweets in English related to agreed themes. This can help you to gain understanding of general (nationwide) discussion topics.
- Dataset with „LA related” Tweets which contains data from the dataset described above filtered down to get only a subset of Tweets related to LA. We are using a query with several hundreds of LA related words (Streets in LA, LA organizations, objects in LA, etc) to filter down the content. This method is not 100% accurate, so we may miss some LA related Tweets as well as include some out of interesting scope (LA context)
- Last dataset contains original Tweets posted from the LA area - we use Twitter geolocation filtering, so accuracy of the filtering is beyond our control (LA - Geo)

If you find it useful, we may also give you access to our Searching Dashboard, with predefined Subject filters. After opening a link in a browser you will be able to see currently posted tweets for each subject almost in real time. You can also search for very specific content using the query language (easy to learn, if you don't know it yet)

As mentioned earlier, we soon plan to add some more stuff:

- Basic bot/troll detection/ratio information
- Articles, blogs and forums published on the internet about topics you are interested in.

1) Please take a look at collected data - especially included tweets - and let us know if it works fine. Please be aware that we cannot filter out all irrelevant messages. We update queries daily to get a reasonable dataset, but there is still a significant amount of unrelated stuff. We may also miss some Tweets or articles - if you find subjects we are missing, please let us know, so we will be able to improve our queries.

2) What is the best time for you to get these newsletters? We recommend you every morning at 8AM your time.

3) Would you like to get the access to searching Dashboard?

4) Would you like to get all 3 dataset reports or we should exclude some?

5) Do you have any Twitter accounts, you would like to monitor closely?

6) Are sub-topics definitions ok?

7) Is there anything we missed here?

I hope you will find our system informative and useful as possible, that's why if you see any areas of improvement - please let us know!

Best regards

Lech
