

THE REUSE MANIFESTO

SUPPORT A LEGALLY BINDING GLOBAL PLASTICS TREATY

with caps on single-use plastics production and reuse targets.

ROLL OUT EXTENDED PRODUCER RESPONSIBILITY (EPR)

for packaging, ensuring a fair system where producers pay the costs of disposal which will level the playing field for reuse.

SET AMBITIOUS AND LEGALLY BINDING TARGETS

for **30% of all packaging to be reusable by 2030** and **5% by 2026**, locking the production and sale of packaging into the target.

COMPLETELY BAN SINGLE-USE PACKAGING

where it's sensible to do so, like in **dine-in settings with more than 20 seats** (as seen in France), and **on certain fruits and vegetables** where evidence shows it would reduce food waste and save consumers money.

CALLING FOR COMMITMENTS TO:

INTRODUCE AN "ALL-IN" DEPOSIT RETURN SCHEME

covering aluminium, glass, and plastic containers of all sizes standardised across the whole of the UK, providing the infrastructure for reuse and recycling.

INTRODUCE A CAP AND REDUCTION ON UK PLASTIC PRODUCTION

reducing the manufacture of polymer to safe planetary boundaries.

Together, we can lead the transition from single-use to reuse. Join us in calling for change!
