Executive Summary

National Grid in its role as EMR Delivery Body is required by the Capacity Market Rules 2014 (Rule 5.10.6), unless instructed to the contrary pursuant to the Regulations, to publish the results of the Capacity Market Auction and to make these results public. This report discharges that obligation.

The T-4 Capacity Auction for delivery in 2018 concluded on 18th December 2014 at 1630 GMT.

This report is to be published 8 Working Days following the conclusion of the Capacity Market Auction, the "Auction Results Day", Friday 2nd January 2015.

The results of the 2014 T-4 Capacity Market Auction are as follows, where all prices are in 2012 prices and any capacity figure refers to de-rated capacity, unless otherwise stated.

- a) The Clearing Price is: **£ 19.40 / kW / year**
- b) The Aggregate Bidding Capacity of Capacity Market Units awarded Capacity Agreements is: **49,258.938 MW**
- c) The total forecast cost of Capacity Agreements awarded (being the product of the Clearing Price and the Aggregate Bidding Capacity of Capacity Agreements awarded) is: **£ 955,623,397.20**
- d) The CMUs to which a Capacity Agreement has been awarded are included in Appendix A.
- e) The Duration of the Capacity Agreement awarded to each CMU is included in Appendix A.

The results of the Capacity Auction have been added to the Capacity Market Register, available at www.emrdeliverybody.com.

The remainder of this report gives further detail on the Capacity Market Auction Clearing, how the Clearing Price was reached and what makes up the capacity that has been procured.

The Auction Clearing Price

The Clearing Price is: **£ 19.40 / kW / year** (2012 prices)

The 2014 T-4 Auction Cleared in Bidding Round 12 on the 18th December, at 1630 GMT.

The Auction did not clear with an exact match of Offered Capacity and target capacity (“Clearing Capacity”) and so the Net Welfare Algorithm was used to determine clearing.

Two CMUs submitted an Exit Bid at the same Exit Price (£19.60). These CMUs differed in their capacity and consequently, duration and random numbers were not used to determine which of the CMUs is the marginal unit. The larger CMU is ranked ahead of the smaller.

Figure 1 shows the Demand Curve and the supply curve. The supply curve is found by cumulatively adding the Bidding Capacities of CMUs, according to their Exit Ranking. The supply curve meets the Demand Curve at a Price of £19.60 / kW.

Figure 1: The Supply Curve

The Points (Qh, Ph) and (Ql, Pl) are marked on Figures 1 and 2. These are the two possible quantity-price pairs which are evaluated by the Net Welfare Algorithm. The ‘high’ pair (subscript ‘h’) includes the capacity of the marginal CMU while the low case (subscript ‘l’) excludes this capacity.

Figure 2: The Net Welfare Algorithm applied to the Marginal Unit

The Net Welfare Algorithm evaluates the integral specified in Capacity Market Rule 5.9.6 to determine whether to include the marginal unit. The algorithm subtracts the additional cost of procuring the marginal unit (the blue checked area less the orange shaded area in the figures above) from the welfare gained by procuring the marginal unit (the green shaded area). If the result is positive i.e. the welfare gained by procuring the additional unit outweighs the cost, the unit is included, and the Clearing Price is set to the Exit Bid Price of that unit.

The result of the Net Welfare Algorithm was negative and the marginal unit has not been procured.

The Auction Cleared with PI = £19.40 /kW, QI = 49,258.938 MW.

The Aggregate Bidding Capacity of CMUs Awarded Capacity Agreements

The Aggregate Bidding Capacity of CMUs awarded Capacity Agreements is: **49,258.938 MW**

A total of 64,969.341 MW entered the Auction, of which 75.82 % received Capacity Agreements for delivery in 2018/19.

Figure 3: 76% of the Capacity Entering the Auction Received Agreements

Figure 4 and Table 1 shows the breakdown of the Total Awarded Capacity Agreements by CMU Type.

A mixture of new and existing Capacity was procured. 9,836.023 MW of the volume of Capacity Agreements awarded is for new or refurbishing capacity. This is the sum of the capacity of CMUs that have been awarded agreements that are Refurbishing, Unproven DSR or New Build Generating CMUs. This excludes CMUs which have only been awarded a Capacity Agreement for their Pre-Refurbishment component.

Figure 4: Breakdown of Awarded Capacity by CMU Type

	Capacity (MW)	Capacity (%)	Number of CMUs	Number of CMUs (%)
Existing Generating CMU	31,446.770	63.84	170 ¹	55.56
Refurbishing CMU	7,048.927	14.31	17	5.56
Pre-Refurbishment CMU	7,967.920	16.18	27 ¹	8.82
New Build Generating CMU	2,621.151	5.32	77	25.16
Unproven DSR CMU	165.945	0.34	13	4.25
Proven DSR CMU	8.225	0.02	2	0.65

Table 1: Breakdown of Awarded Capacity by CMU Classification

Figure 5 shows the breakdown of CMUs awarded Capacity Agreements by Technology Type.

Figure 5: Capacity Awarded by Technology Type

The majority of the Capacity Agreements awarded, by capacity, are to Combined Cycle Gas Turbine (CCGT) plants.

¹ 15 Refurbishing CMUs with Capacity totalling 2119.236 MW opted to enter the auction with only their Pre-Refurbishing components. These were treated as Existing Generating CMUs by the IT Auction System. These are listed here and on the Capacity Market Register as Refurbishing CMUs, in their Pre-Refurbishment state.

	Capacity (MW)	Capacity (%)	Number of CMUs	Number of CMUs (%)
CCGT	22,258.651	45.19	47	15.36
CHP & autogeneration	4,235.068	8.60	36	11.76
Coal/Biomass	9,232.183	18.74	29	9.48
DSR	174.170	0.35	15	4.90
Hydro	682.162	1.38	29	9.48
Nuclear	7,876.108	15.99	16	5.23
OCGT and Reciprocating Engines	2,101.223	4.27	121	39.54
Storage	2,699.373	5.48	13	4.25

Table 2: Breakdown of Awarded Capacity by CMU Type

The Total Forecast Cost of Capacity Agreements Awarded

The total forecast cost of Capacity Agreements Awarded is: **£ 955,623,397.20**

This cost is the product of the Aggregate Bidding Capacity of CMUs awarded Capacity Agreements and the Clearing Price.

This cost is in 2012 prices and applies to the Delivery Year 2018/19. Payments made to Capacity Providers will be indexed according to the methodology stated in the Electricity Capacity Regulations Schedule 1(3).

The CMUs to which Capacity Agreements have been Awarded

A List of the CMUs and their status has been included in Appendix A. In total there are 306 CMUs that have been awarded Capacity Agreements, from 46 Bidding Companies.

The Duration of Agreements Awarded

The duration of the Capacity Agreement received for each CMU is listed in Appendix A.

76.47% of CMUs that received Capacity Agreements were for a duration of 1 Year. 2.61 % of CMUs received 3 Year agreements whilst 19.28 % received 15 year Capacity Agreements. Five CMUs selected an obligation period of 14 years ahead of the Auction and have received 14 Year Capacity Agreements.

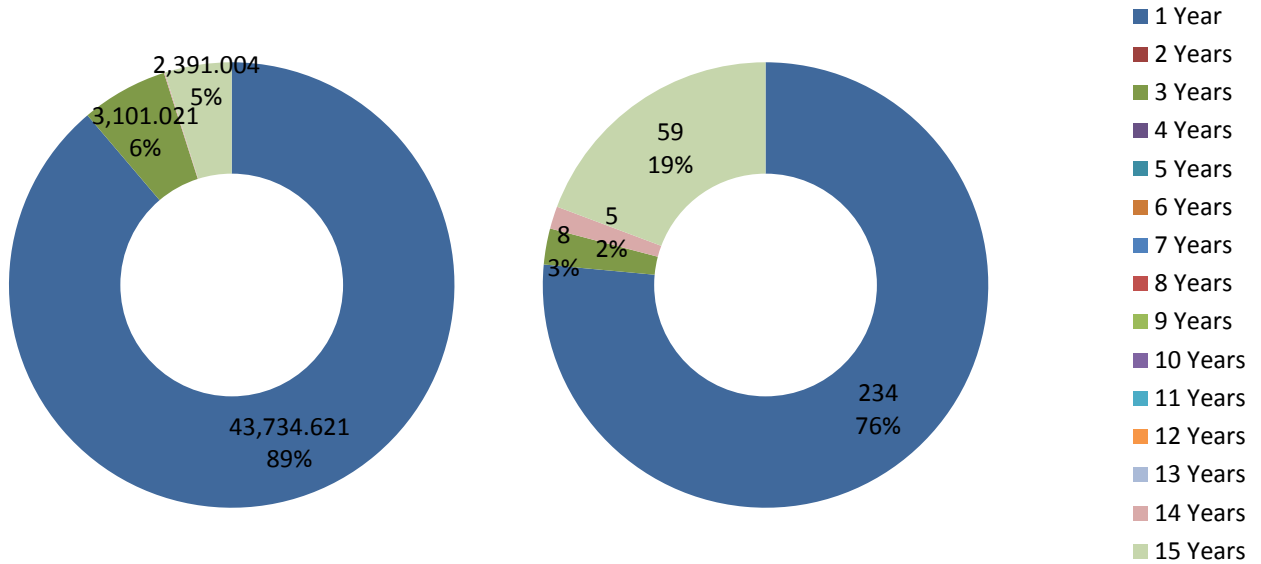

Figure 6: Duration of Capacity Agreement by Capacity

	Capacity (MW)	Capacity (%)	Number of CMUs	Number of CMUs (%)
1 Year	43,734.621	88.79	234	76.47
2 Years	0.000	0.00	0	0.00
3 Years	3,101.021	6.30	8	2.61
4 Years	0.000	0.00	0	0.00
5 Years	0.000	0.00	0	0.00

14 Years	32.292	0.07	5	1.63
15 Years	2,391.004	4.85	59	19.28

Table 3: Breakdown of Awarded Capacity by Duration

Final Auction Results

Capacity Agreements with duration of more than one year provide capacity in additional Delivery Years to 2018/19. The volume of Capacity Agreements awarded in the 2014 T-4 Capacity Market Auction for Delivery Years 2018/19 – 2032/33 are shown in Figure 7 and Table 4.

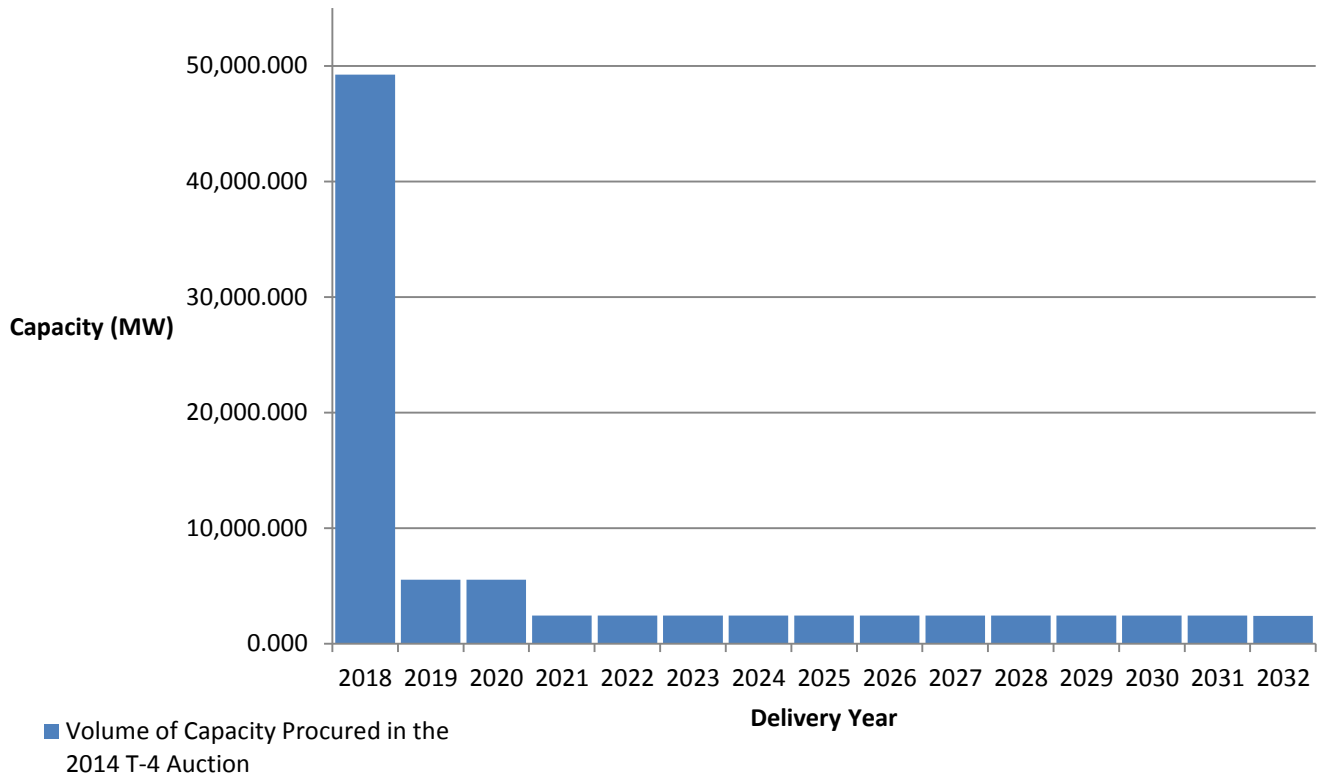

Figure 7: Volume of Capacity Procured by Delivery Year

Delivery Year	Volume of Capacity Procured in the 2014 T-4 Auction
2018	49,258.938
2019	5,524.317
2020	5,524.317
2021	2,423.296
2022	2,423.296
2023	2,423.296
2024	2,423.296
2025	2,423.296
2026	2,423.296
2027	2,423.296
2028	2,423.296
2029	2,423.296
2030	2,423.296
2031	2,423.296
2032	2,391.004

Table 4: Capacity Procured by Delivery Year

Capacity that Exited the Auction above the Clearing Price

A total of 15,710.403 MW exited the auction above the clearing price. This Capacity is broken down by CMU Classification and Technology Type in Figures 8 and 9 below.

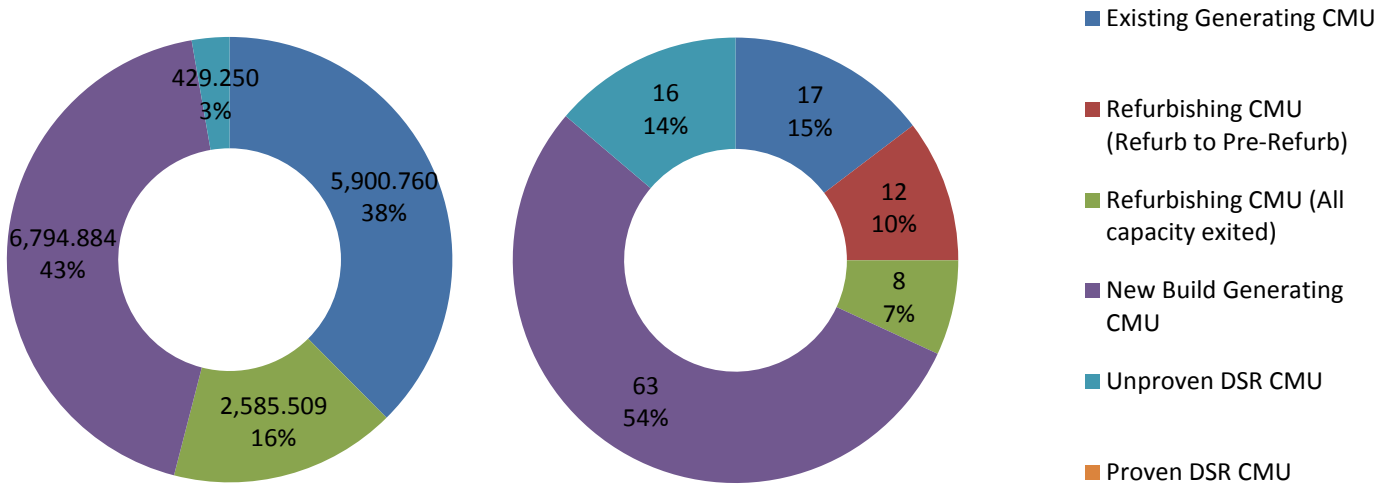

Figure 8: Capacity that exited the Auction above the Clearing Price

	Capacity (MW)	Capacity (%)	Number of CMUs	Number of CMUs (%)
Existing Generating CMU	5,900.760	37.56	17	14.66
Refurbishing CMU (Refurb to Pre-Refurb)	0.000	0.00	12 ²	10.34
Refurbishing CMU (All capacity exited)	2,585.509	16.46	8	6.90
New Build Generating CMU	6,794.884	43.25	63	54.31
Unproven DSR CMU	429.250	2.73	16	13.79
Proven DSR CMU	0.000	0.00	0	0.00

Table 5: Capacity Exited by CMU Classification

New Build Generating CMUs make up the largest group of Capacity that Exited the Auction by Classification.

² 12 CMUs submitted Duration Bid Amendments (DBAs) to move to the Pre-Refurbishment state above the Clearing Price. However, the Pre-Refurbishment Capacity of these CMUs is equal to their Post-Refurbishment Capacity, and as such 0 MW of capacity exited from these CMUs.

Figure 9: Capacity that exited the auction above the Clearing Price by Technology Type

	Capacity (MW)	Capacity (%)	Number of CMUs	Number of CMUs (%)	Capacity Exited as a proportion of Capacity Entering the Auction (%)
CCGT	8,846.950	56.31	16	13.79	28.44
CHP & autogeneration	541.710	3.45	7	6.03	11.34
Coal/Biomass	4,499.193	28.64	7	6.03	32.77
DSR	429.250	2.73	16	13.79	71.14
Hydro	0.000	0.00	0	0.00	0.00
Nuclear	0.000	0.00	12 ²	10.34	0.00
OCGT and Reciprocating Engines	1,344.710	8.56	57	49.14	39.02
Storage	48.590	0.31	1	0.86	1.77

Table 6: Capacity Exited by CMU Type

The technology class that exited the highest proportion of the volume entering the auction, 71%, was DSR. The Technology Type exiting the largest overall volume of capacity from the auction was CCGT plant (8,847 MW).

CMUs Removed by the Auctioneer

The Prequalification decision for one CMU (BACITI) was changed to “Rejected” after the Capacity Market IT Auction System was populated with data that had been checked by the Bidders. To avoid the need for all Bidders to re-check their data and prevent loss of any customisation of the system, this CMU was exited at the Price Cap rather than removed from the IT Auction System.

Final Auction Results

Bidding Company	CMU ID	Reason for Removal
SDCL EE Co (UK) LLP	BACITI	CMU Prequalification Status was updated to “Rejected” after the auction system data was populated.

Pursuant to an Ofgem enforcement decision, the Prequalification statuses of several CMUs were updated to “Not Prequalified” after the IT Auction System data was populated. As such, under Capacity Market Rule 5.3.3 the Auctioneer is required to submit an Exit Bid at the Price Cap for any CMUs where the Auctioneer becomes aware that the CMU should be disqualified.

In Round 1, the Auctioneer exited 11 such CMUs at the Price Cap. These totalled 183 MW of Capacity. The CMUs and the reasons for their disqualification are listed below.

As these Exit Bids took effect well above the Price Cap of the Clearing Round, no other Bidding CMU was denied a Capacity Agreement by the removed unit’s inclusion at the beginning of the Auction.

Bidding Company	CMU ID	Reason for Disqualification
UK Capacity Reserve Ltd	UKCR01	Pursuant to an Ofgem enforcement decision the Prequalification status of this CMU was updated to “Not Prequalified” after the auction system data was populated.
UK Capacity Reserve Ltd	UKCR17	Pursuant to an Ofgem enforcement decision the Prequalification status of this CMU was updated to “Not Prequalified” after the auction system data was populated.
UK Capacity Reserve Ltd	UKCR30	Pursuant to an Ofgem enforcement decision the Prequalification status of this CMU was updated to “Not Prequalified” after the auction system data was populated.
UK Capacity Reserve Ltd	UKCR33	Pursuant to an Ofgem enforcement decision the Prequalification status of this CMU was updated to “Not Prequalified” after the auction system data was populated.
UK Capacity Reserve Ltd	UKCR39	Pursuant to an Ofgem enforcement decision the Prequalification status of this CMU was updated to “Not Prequalified” after the auction system data was populated.
UK Capacity Reserve Ltd	UKCR49	Pursuant to an Ofgem enforcement decision the Prequalification status of this CMU was updated to “Not Prequalified” after the auction system data was populated.
UK Capacity Reserve Ltd	UKCR51	Pursuant to an Ofgem enforcement decision the Prequalification status of this CMU was updated to “Not Prequalified” after the auction system data was populated.
UK Capacity Reserve Ltd	UKCR66	Pursuant to an Ofgem enforcement decision the Prequalification status of this CMU was updated to “Not Prequalified” after the auction system data was populated.
UK Capacity Reserve Ltd	UKCR83	Pursuant to an Ofgem enforcement decision the Prequalification status of this CMU was updated to “Not Prequalified” after the auction system data was populated.
UK Capacity Reserve Ltd	UKCR87	Pursuant to an Ofgem enforcement decision the Prequalification status of this CMU was updated to “Not

Final Auction Results

Prequalified” after the auction system data was populated.

UK Capacity Reserve Ltd

UKCR93

Pursuant to an Ofgem enforcement decision the Prequalification status of this CMU was updated to “Not Prequalified” after the auction system data was populated.

Appendix A – A Complete List of CMUs and their Statuses

Note: Where a Capacity Agreement has been awarded the Capacity and duration are the Capacity and duration awarded. Where no Capacity Agreement has been awarded, the Capacity is the Capacity of the CMU at the Auction Price Cap.

Where the “Applicant Companies” have been created in the same application and share the same Main Administrator, they have been given the option to aggregate into Bidding Companies. The Results on the Capacity Market Register are listed by Applicant Company, rather than by the aggregated “Bidding Company”.
