COVID-19 UPDATES

	Update Status	Observation Date
Latest Update	<p>Since March, Iraq has imposed movement restrictions and closed border points to control the spread of the virus. The border closures have been a major obstacle for refugees and asylum seekers, mainly from Syria. However, UNHCR reports that since July the Peshkhabour Border Crossing Point has been open intermittently—albeit only to accept the readmission of Syrians already registered in the Kurdish Region of Iraq (KR-I). More recently, with cases rising rapidly in the country, the government announced the closure of the border with Iran—believed to be in order to prevent Iranian pilgrims from entering the country to mark Arbaeen in Najaf and Karbala. Iraq’s 1.4 million internally displaced persons (IDPs) also represent an extremely vulnerable group in the country. Many IDPs live in precarious and overcrowded shelters that lack adequate hygiene facilities. NGOs and international organisations have provided sanitation kits and health counselling. According to UNHCR, as of 27 August 2020 a total of 68 Covid-19 cases have been confirmed amongst the refugee and IDP community—including in camps in Anbar, Dohuk, Erbil, and Ninewa Governorates. In some camps, management have initiated lockdowns in-line with Camp Coordination and Camp Management Covid-19 preparedness and response plans. On 2 September, for the first time since border closures in March, a “voluntary” repatriation flight from Europe returned some 50 Iraqis. The flight was provided by Germany, France, the Netherlands, and Belgium, together with the IOM, and was supported by the EU and financed by Frontex.</p>	2020
