MiClinic EHR manages all transactions of outpatient clinics, in-patient "Bed Management" , operations and pharamcy. it has also special modules to handle radiology and laboratory departments .

## Why MiClinic EHR ?

It is a total management solution for the whole healthcare service provider organization.

it is part of MILLENSYS unified eHealth platform , so you can combine EHR , ERP and VNA / PACS in one native solution to handle clinical data , imaging and financial data as well .

It is Web based and support multi-lingual that can work in a cloud and on premise.

it is a single application with a single database architectre for all modules (clinical , financial and imaging)

It has a single node web administrator for all the solution.

it works with any device , PC , tablet , mobile phone , ...etc.

It Supports multi branch organizations for both clinical and financial analysis.

It has a seamless Integration with MILLENSYS VNA "Vision Tools Workspace VNA" .

It can integrate with any other PACS using HL7 standards.
