

Changes to the SAS Certified Data Scientist Track

Technology evolves rapidly. To maintain the relevance of our certifications, we regularly review our exam portfolio, ensuring that our certifications encompass the latest skills and SAS technologies while phasing out those that have become outdated. We aim to provide professionals with a framework to advance their skills in data analytics and AI using SAS Software.

We have made the decision to retire several Certification exams that are part of the SAS Data Scientist Certification Pathway effective June 30, 2025

Please note that all certifications earned before the exam retirement date will not expire and will remain valid after the certifications are retired.

Exams Scheduled to Retire

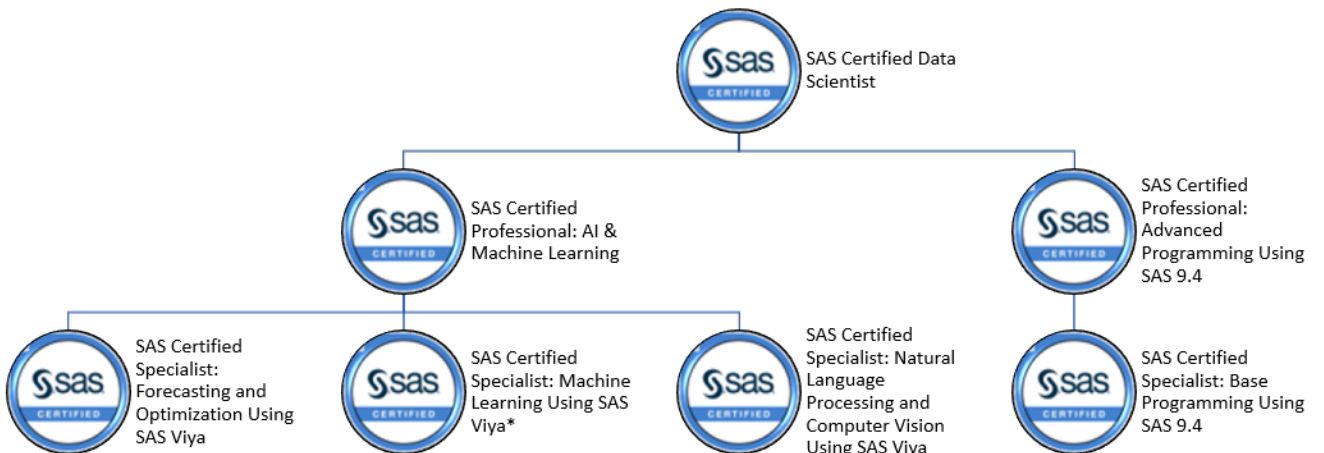

Advanced Analytics Professional Pathway

Title	Code	Retirement date
SAS Advanced Predictive Modeling	A00-225	June 30, 2025
SAS Text Analytics, Time Series, Experimentation and Optimization	A00-226	June 30, 2025

Data Curation Certification

Title	Code	Retirement date
Data Curation for SAS Data Scientists	A00-223	June 30, 2025

Data Scientist Pathway (after June 30, 2025)

*SAS Certified Predictive Modeler can be substituted to meet this requirement

Check Your Progress

If you are working through the SAS Data Scientist Certification Pathway, it is recommended that you make plans to complete it prior to June 30, 2025. If you wish to check your progress to determine what exam requirements you have left, you can do so by accessing your account in the SAS Certification Manager system. Follow the below instructions.

1. Login to your account in [SAS Certification Manager](#)
2. Select **My Certifications > Status** from the menu.
3. Review “Active” or “In Progress” Certifications by clicking **VIEW MORE**.
