

Bree

A spirited and rhythmic upright
italic, ideal for display use.

DESIGNED BY

Veronika Burian
José Scaglione

YEAR

2008
2019 update
2021 update

The Bree font family is a spry sans serif by Veronika Burian and José Scaglione that delivers a spirited look and feel for branding and headline usage. As an upright italic, Bree shows a pleasant mix of rather unobtrusive capitals with more vivid lowercase letters, giving text a lively appearance.

Bree is clearly influenced by handwriting. As such, some of its most characteristic features are the single-story 'a', the cursive 'e', the outstroke curves of 'v' and 'w', the flourished 'Q', and the fluid shapes of 'g', 'y', and 'z'. Alternates of these letters are available when a more neutral look is desired. Bree has a touch of cheekiness, a wide stance for each character, and an extra-large x-height. All this adds up to a big personality, so even when set in small text there is no skimming past the words Bree voices.

In 2019, the Bree font family got a huge update. A few shapes were updated or added (the 'k' and German capital 'ß'), two entirely new weights were added (Book and Book Italic), and spacing was perfected. More than that, Vietnamese support was added to Bree Latin, and the Bree Greek and

Bree Cyrillic scripts were designed from scratch to parallel the Latin's tone. Arabic and Thai scripts were added in 2021, along with Pinyin and refined Vietnamese diacritics being added to the Latin, and Devanagari is currently under development. Additionally, Bree was designed in the variable font format for those who want complete control over the font's appearance while simultaneously saving digital weight in the form of megabytes. This means Bree is in the perfect position for the next digital revolution.

The complete 14-weight Bree Latin font family includes Pinyin, Vietnamese, and is available in standard OpenType or variable font formats. It has been chosen for such wide-ranging uses as the branding for the country of Peru, Breast Cancer Awareness Month in the US, organic food brands, and numerous layouts including mobile apps, newspapers, online magazines, and books. Be sure to check out the other scripts in the full multiscript Bree family: Arabic, Latin (including Pinyin and Vietnamese), Cyrillic, Greek, and Thai.

VARIABLE STYLES

Thin <--> **Extrabold**
Thin Oblique <--> **Extrabold Oblique**

Variable fonts are a new part of OpenType technology that allows typeface creators to design fonts, and users to organise and use them, in a more advanced way than was done in the past.

Rather than having one individual font style per font file (i.e., extralight, regular, bold, or extrabold), variable fonts are one file with almost infinite choices within a single “design space”, the total boundaries for a typeface’s appearance.

So what’s a design space? A design space is the total area containing all axes which the font user can customise: weight, width, serif length, optical size, and more. A series of sources (or masters or exemplars) determine the appearance of all lettershapes at certain positions on each axis.

Imagine a design space like a chess board grid with sources lining the edges. Opposite sources usually have opposing characteristics, like extralight versus extrabold. A move in any direction affects the look of the font since the movement brings it closer to one source or another. The closer to one source, the more it will look like that one and the less it will look like the opposite source. So moving in the design space always causes a change in the look of the font.

The final characteristics of the font are defined by the total proximity to all exemplars — where it is located within the total design space.

To get a more accurate picture, now imagine that this grid is not two-dimensional, but is a three-dimensional cube; it has depth, meaning the font creator has defined more than two axes. The user is able to move through that cubed design space, and as they do the font changes in accordance with how close it is to the sources that have defined its look.

Thanks to variable font technology, this means graphic designers and web developers can use mathematically generated styles that, while never actually drawn by the font creator, still exist within that total design space. And the file size is just a fraction of what normal font files are. This is great news for developers, for data use on mobile, for rendering, and for prioritising speed and responsiveness — not to mention creativity!

In a few cases, when some glyphs cannot smoothly transition across the spectrum of instances, a modification called a “jump” is included. Currently not all software responds to variable fonts in the same way.

THE DESIGNERS

Veronika Burian studied Industrial Design in Munich and worked in that capacity in Vienna and Milan over a few years. Discovering her true passion for type, she graduated in 2003 with distinction from the MA in Typeface Design course in Reading, UK. Veronika then worked as a type designer at DaltonMaag in London for a few years, spent some time in Boulder, USA, and then her hometown, Prague, and is now enjoying life in sunny Cataluña, Spain.

Veronika is a type designer and the co-founder of the independent type foundry TypeTogether with José Scaglione, publishing award-winning typefaces and collaborating on tailored typefaces for a variety of clients. She is also involved with Alphabetes.org, a showcase for work and research on lettering, typography, and type design by women, and she continues to give lectures and workshops at international conferences and universities.

José Scaglione is a graphic designer, typeface designer, and co-founder of the independent type foundry TypeTogether with Veronika Burian, where they have published numerous award-winning type families. He teaches typography at the University of Buenos Aires, Argentina, and is frequently invited to lecture about typography and to lead workshops on typeface design at international conferences and academic institutions. José co-authored the book *Cómo Crear Tipografías: Del Boceto a la Pantalla*, and collaborated with Jorge de Buen Unna on his book *Introducción al Estudio de la Tipografía*.

In 2012 José acted as chairman of the Letter.2 type design competition and conference, and he was appointed president of the Association Typographique Internationale (ATypI) from 2013 to 2017.

- Special mention at 2019 GRANSHAN (multiscript)

FAMILY UPGRADES

Buy a single weight (or more) now and get reimbursed if you buy the entire font bundle at a later time. This is a great way to explore a new typeface without full commitment. To take advantage of the upgrade, please email info@type-together.com.

CUSTOM WORK

We offer custom font solutions tailored to your needs. This includes developing new typefaces from scratch, modifying existing typefaces, extending language support, and creating logotypes. Please contact us for details at info@type-together.com.

LICENSING

Our complete font catalogue, along with the presented type family here, are available for print, self-hosted web applications, and app embedding from TypeTogether's online store. For other types of licences and more information, please contact us at info@type-together.com.

TESTING OUR FONTS

TypeTogether actively seeks ongoing dialogue with all type users and therefore offers free temporary licences to test any of our typefaces. The test fonts are fully functional and include the entire character set and OpenType features. To request test fonts, please contact us at info@type-together.com.

PREMIER

TypeTogether Premier is our free service that makes it easy for creatives to access and test our entire font library with a one-click trial licence. You'll find over 70 high-quality, award-winning font families, 600+ styles, and support for nine unique writing systems, with more on the way. And only TypeTogether Premier partners are the first to test beta fonts and use them in commercial work before anyone else.

To apply now for TypeTogether Premier, go to www.type-together.com/premier and select Sign Up.

EDUCATIONAL & CHARITY DISCOUNT

TypeTogether offers an educational discount on all typeface purchases for students and those in education (schools, departments, etc.). This discount also extends to NGOs and charities in general. Please contact us for details at info@type-together.com.

For further information, samples, and ordering, please visit www.type-together.com.
