Austria	The Global Network of Regional Sustainable Energy Centers (GN-SEC). • A global platform to promote south-south and triangular cooperation for accelerated progress. The GN-SEC contributes to the local areas energy access and affordability, climate change and reduction of pollution.	1.) Advocate for a just energy transition that addresses the needs of LDCs and SIDS and generate domestic green jobs and income. 2.) Provide regional organizations with the urgently needed technical capacities to coordinate and monitor the implementation of regional energy and climate policies/regulations on national level. 3.) Complement regional banks when it comes to the addressing of "soft" issues hindering the de-risking and long term sustainability of investments (e.g. policy, standards, laws, qualification, and certification) 4.) Facilitates south-south and triangular cooperation (SSTC) on clean energy issues and solutions between the various centres, regions, as well as partners of the Global North and the multilateral level. 5.) Test, demonstrate and roll-out latest technology, policy and business model innovations in various regions simultaneously. 6.) Promote regional and intra-regional renewable energy and energy efficiency solutions, the GN-SEC accelerates progress towards SDG-7, SDG-9, SDG-12 and SDG-13. 7.) Demonstrate how regional institutional capacities and integration can address global cross-border challenges more effectively and at lower cost	1.) Help to position the GN-SEC an important SSTC platform to facilitate joint learning, as well as exchange of best practice and information; 2.) Advocate in UN processes for the importance of regional cooperation as a tool to accelerate the energy transition in the Global South. 3.) Help with pooling resources and funding for joint SSTC activities of the GN-SEC platform and individual regional centres;	The Global Network of Regional Sustainable Energy Centers (GN-SEC) - 10 operating centres cover 120 member states, including 40 of 45 least developed countries (LDCs) and 35 of 39 small island developing states (SIDS); Austrian Ministry of European and International Affairs; United Nations Industrial Development Organization (UNIDO) ; supported by manifold donors and financiers (e.g. EU, AT, GER, SE, NOR, US, NZ, AUS, UK, UN agencies, IFIs).	GN-SEC platform The UNIDO project document "The Global Network of Regional Sustainable Energy Centers Platform - South-South and triangular cooperation for accelerated progress" https://downloads.unido.org/07/32/63/326377/061910223/2024-SEC_Project_Document%20FINAL%20CLEAN.pdf
China on behalf of GoF of GDI (82 Member States)	Global Development Initiative (GDI): • Aims to pool efforts to tackle challenges, promote economic recovery, support the timely implementation of the 2030 Agenda by revitalizing global development partnership, and promoting stronger, greener and healthier global development. • More than 100 countries and 20 international organizations support the GDI, more than 80 countries have joined the Group of Friends of the GDI. • The GDI has mobilized 20 billion USD for development. Under the Support by the Global Development and South-South Cooperation Fund, the China-UN Peace and Development Fund and other financial resources, over 1100 cooperation projects have been implemented under the GDI, bringing tangible benefits to the Global South. • More than 30 cooperation platforms have been developed, focusing on priority areas including poverty eradication, food security, financing for development, climate change and green development, industrialization, digital economy and connectivity in the digital era.	1) Welcoming extensive participation, with the UN as an important partner and the Group of Friends of the GDI as the main actors, to build a good example of cooperation and encourage the participation of more countries and institutions; 2) Regular GoF meeting in promoting policy dialogue, experience sharing, capacity building and identifying practical cooperation; 3) Effectively mobilizing and allocating resources to forge the greatest possible synergy for development; 4) Practical cooperation on addressing the current pressing challenges including poverty, food and energy insecurity as well as disruption to industrial and supply chains; 7) Encouraging North-South and triangular cooperation by inviting developed countries, international financial institutions, development aid agencies, international businesses and non-profit foundations, to increase inputs in GDI cooperation; 8) Promoting dialogue and coordination between the GDI GoF and the relevant UN development entities; 9) Facilitating the application of developing countries for financial support in response to their development needs.	1) Establish a working group dedicated to the GDI cooperation in collaboration with the Group; 2) Convene regular working group meetings to identify opportunities for cooperation; 3) Conduct joint projects, help other countries realize the Sustainable Development Goals; 4) Foster stronger partnership between the Group of Friends and relevant UN development entities.	180 countries and 20 international organizations ; Global Development and South-South Cooperation Fund, the China-UN Peace and Development Fund	
Singapore	Safety Assessment of Novel Food: To encourage the harmonisation of international conversations on the safety assessment of novel foods.	1.) Provide a platform to raise awareness of new technologies for novel food production 2.) Discuss challenges in safety assessment 3.) Explore opportunities to advance the regulatory agenda while encouraging food innovations 4.) Contribution to technical discussions on the food safety challenges associated to cell-based food as well new foods and new food production systems held by the FAO.		FAO; Singapore Food Agency (SFA) / National Centre for Food Safety (NCFS)	
	International Harmonisation of Pesticide Maximum Residue Limits (MRL): To safeguard public health and facilitate agri-food trade.	1.) Continue participating in cross-regional projects of pesticide residues data generation and submission of residues data package to JMPR for establishment of Codex MRLs of minor crops 2.) Collaboration with USDA and FSANZ in promoting the adoption of APEC Guidelines on Import MRLs in ASEAN through Singapore's role as Chair country of the ASEAN Expert Working Group on Pesticide-MRL harmonization in 2023-25 3.) Continue working with ASEAN dialogue partners such as PTB (Germany) and JICA (Japan) to roll out physical/virtual workshops under Singapore's role as ASEAN Food Reference Laboratory for Pesticide Residues to strengthen the pesticide analysis and MRL enforcement capabilities of Cambodia, Laos, Myanmar and Vietnam ("CLMV countries")		United States Department of Agriculture (USDA) ; Food Standards Australia New Zealand (FSANZ); ASEAN Expert Working Group on Pesticide Residues (JMPR); Codex Committee on Pesticide Residues (CCPR); Physikalisch-Technische Bundesanstalt (PTB, Germany); Japan International Cooperation Agency (JICA, Japan); Singapore Food Agency (SFA) / National Centre for Food Safety (NCFS)	
	Singapore Cooperation Programme (SCP): Set up in 1992 to extend technical assistance to fellow developing countries and pay forward the assistance which Singapore received from the international community in early years. SCP works with more than 50 local and international partners to organise more than 250 capacity building programmes annually.	1.) Support the 2030 Agenda for Sustainable Development and cover key topics to respond to the changing needs of developing countries, including on digitalisation, climate change, food and water security.		Ministry of Foreign Affairs Singapore (MFA) / Technical Cooperation Directorate; More than 50 local and international partners (e.g., UNICEF, UNDRR, WHO and WTO)

SENEGAL	<p>Great Green Wall Project: Pan-African initiative to combat desertification through tree planting and restoration of degraded lands.</p>	<ol style="list-style-type: none"> Securing funding from international partners such as the African Union, World Bank, and Global Environment Facility (GEF). Committing public and private Senegalese funds to support reforestation and land restoration activities. Collaborating with other African countries to implement transboundary desertification control initiatives. Engaging local communities in planting and managing natural resources. 		<p>targeting - African Union and African countries, World Bank, and Global Environment Facility (GEF); Local communities;</p>	

TURKIYE	<p>Lifelong Learning Activities For Refugees: aims to provide sustainable livelihood opportunities for refugees and the host community affected by the February 2023 Kahramanmaraş earthquake by establishing textile workshops in disaster-affected regions, enhancing educational facilities, and promoting vocational training through public education centers.</p>	<ol style="list-style-type: none"> 1. Establishing additional textile workshops in earthquake-affected regions. 2. Providing vocational skills training for refugees and host community members. 3. Constructing public education centers to enhance educational access and facilities. 4. Collaborating with UNHCR for resource mobilization and support. 5. Monitoring progress through training outcomes and product production metrics. 6. Expanding the initiative to other regions affected by natural disasters. 	<ol style="list-style-type: none"> 1. Provide technical support in skill development and production processes. 2. Offer expertise in scaling the initiative to additional regions or countries. 3. Assist in resource mobilization and partnership development with local and international stakeholders. 	<p>United Nations High Commissioner for Refugees (UNHCR), Ministry of National Education, Public Education Centers, Private Sector Stakeholders</p>	
	<p>Establishing Children's Libraries in Earthquake Areas: aims to establish accessible and inclusive children's libraries in communities to promote literacy, foster reading habit of children, and provide a safe and stimulating environment for children affected by the 6 February 2023 Kahramanmaraş earthquake to explore and learn. The libraries will be equipped with a diverse collection of books, digital resources, and educational programs tailored to meet the needs of children of different ages and backgrounds.</p>	<p>Ongoing:</p> <ol style="list-style-type: none"> 1. Establishing children's libraries in earthquake-affected areas. 2. Engaging local schools, parents, and leaders in planning. 3. Securing books and digital resources through partnerships. 4. Training staff and volunteers to manage libraries and programs. <p>Future:</p> <ol style="list-style-type: none"> 1. Expanding libraries to more affected areas. 2. Developing tailored literacy and educational programs. 3. Introducing digital literacy initiatives. 4. Monitoring usage and literacy outcomes. 5. Building new partnerships and volunteer programs. 	<ol style="list-style-type: none"> 1. Technical Support 2. Resource Mobilization 3. Global Partnerships 4. Digital Connectivity 	<p>Ministry of National Education, NGOs, Private Sector, Publishing Companies, International Organizations, Local Communities</p>	
	<p>The European Biodiversity Partnership: Aims to coordinate research programs between the EU and its Member States and Associated Countries, and mobilize environmental authorities with research, funding agencies and environmental protection organizations (75 organizations from 37 countries) as key partners for the implementation of biodiversity research and innovation, together with ministries.</p>			<p>EU and its Member States and Associated Countries; Associated Countries; Environmental authorities; Funding agencies; Environmental protection organizations (75 organizations from 37 countries)</p>	
	<p>The Project for Increasing Employability of Syrians and Host Communities in the Renewable Energy Sector: aims to foster local and sustainable economic growth within the renewable energy sector by providing vocational training and enhancing the skills of both Syrian refugees and host communities. It focuses on creating a skilled workforce, promoting inclusivity in energy access, and facilitating technology transfer for green transformation.</p>	<p>Ongoing Activities:</p> <ol style="list-style-type: none"> 1. Vocational Training Programs: Continuing to deliver renewable energy training courses, including topics like photovoltaic solar panel installation and integration with hybrid systems. 2. Employment Analysis: Conducting assessments and interviews with trainees to evaluate job placements and entrepreneurship outcomes. 3. Collaboration with Local Institutions: Partnering with local training institutions to enhance infrastructure and training capacity in the renewable energy sector. 4. Workshops and Awareness Campaigns: Organizing workshops with the private sector to raise awareness about employment opportunities in renewable energy. <p>Future Activities:</p> <ol style="list-style-type: none"> 1. Expansion of Training Programs: Developing new courses based on demand assessments and industry needs to train additional beneficiaries in emerging renewable energy technologies. 2. Certification Programs: Aiming to increase the number of vocational training certifications awarded, targeting at least 1,800 beneficiaries by the project's completion. 3. Partnership Development: Establishing further collaborations with NGOs, private sector stakeholders, and educational institutions to broaden the project's reach and impact. 4. Sustainability Initiatives: Fostering community-led initiatives for renewable energy projects to ensure long-term sustainability and local ownership of energy solutions. 5. Monitoring and Evaluation: Continuously assessing the impact of training programs and adjusting strategies based on feedback and labor market trends to optimize outcomes for trainees. 	<ol style="list-style-type: none"> 1. Technical Support 2. Financial Support 3. Partnership Development 4. Monitoring and Evaluation 5. Policy Advocacy 	<p>United Nations Development Programme (UNDP), Ministry of Energy and Natural Resources, Ministry of Foreign Affairs, Ministry of Trade, Anadolu University, PTT (Turkish Post Office), Government of Korea, Training Institutions, Local NGOs, Private Sector Companies, Syrian and Host Community Associations</p>

National Focus/Impact
(Draft)

Country	Initiatives	Ongoing & Future Activities	Proposed Task Force Engagement	Partners/ Stakeholders	Resources
Cambodia	Cambodia Digital Transformation (Digital Infrastructure)	<ol style="list-style-type: none"> 1.) The government plans to setup Community Tech Center (CTC) in all high schools nationwide. CTC aims to provide training on digital skill essential and promote lifelong learning for students, government official and the public. CTC has 4 main functions: computer lab, training room, digital library and internet access, post office. 2.) Strengthen and expand mobile and broadband infrastructure 3.) Promote the establishment of national data centers with both the operation and disaster recovery centers, using cloud technology to provide infrastructure, platform, software, and data services 4.) Establish digital government network infrastructure that connects all ministries, institutions and Cambodian missions abroad through the government's private network 5.) Promote the development of a satellite ecosystem 6.) Strengthen and expand the Cambodia Data Exchange (CamDX) platform to allow the exchange of data between information systems of all ministries and institutions and be able to connect with information systems of the private sector to enhance the effectiveness of public service provision. 7.) Promote the connection of digital infrastructure at the sub-national level from the capital and provincial to commune levels, such as to commune offices, police stations, schools, health centers, and towns 8.) Build and strengthen national payment gateway infrastructure for public services 9.) Strengthen the management and protection system for the national information infrastructure 10.) Put in place and strengthen the security of National Internet Gateways (NIG) 11.) Develop and strengthen digital identity infrastructure to support the management, use, and verification of natural persons' and legal entities' digital identities used for operating digital platforms within the framework of both the digital government and private sector 12.) Development of Postal Service Infrastructure 		High schools; All ministries; Cambodian missions	
	Cambodian Sustainable Development Goals Framework 2016-2030 (CSDGs)	<p>the Ministry of Planning will:</p> <ol style="list-style-type: none"> 1.) Lead the facilitation of the mainstreaming of CSDGs' goals, targets, and indicators into sectoral strategic development plan and sub-national development plans and set up and implement activities to achieve those goals, targets, and indicators. 2.) Request Ministry of Economy and Finance to allocate budget to support any activity contributing to achieving CSDGs. 3.) Encourage line ministries and agencies to mobilize resources from development partners to support their CSDGs-associated activities. 4.) Produce Voluntary National Review every two years. 		Ministry of Planning; Ministry of Economy and Finance	
	Food Systems, Food Security and Nutrition (Various)	<p>National: 1) The 3rd National Strategy for Food Security and Nutrition 2024-2028 (in draft); 2) the Cambodia's Roadmap for Food Systems for Sustainable Development; 3) National Social Protection Policy Framework 2016-2025; 4) Fast Track Roadmap for Improving Nutrition 2021-2030; and 5) Global Action Plan on Child Wasting Country Operational Roadmap.</p>		Lancang-Mekong countries and the Mekong Sub-Region; ASEAN Economic community; EU and member States	
	Ministry of Economy and Finance (Various): Dedicated to driving sustainable development and economic resilience through series of strategic initiatives that align with the SDGs. MEF has focused on key areas including the informal economy, real estate, food and drug safety, public-private partnerships, and comprehensive economic recovery plans.	<ol style="list-style-type: none"> 1. Roadmap towards UHC 2024-20352. 2. Expanding Social Security including social healthcare scheme, Work injury scheme, and pension scheme 3. National Social Assistance Programs in the Family Package 4. Expanding Health Equity Fund 5. Social Assistance TVET Program 6. Expanding National Home-Grown School Feeding Program 7. Shock Responsive Social Protection (SRSPP) Framework 8. Graduation Based Social Protection Program (GBSP) 9. The Strategic Framework and Programs for Economic Recovery in the Context of Living with Covid-19 in a New Normal 2021-2023 10. Government interventions/initiative aiming at economic development, employment and industrial development 11. Other initiatives that are related to digitals and innovations 12. Revenue Mobilization Strategy Phase I (2014-2018) and phase II (2019-2023): 		Ministry of Economy and Finance	

SDG-related Initiatives Led by Member States: National Focus/Impact

Colombia	<p>Use of organic waste in home gardens in the municipality of María La Baja - Bolívar, as a contribution to the eradication of hunger and the promotion of sustainable agriculture: Aims to implement a technical assistance program that contributes to the strengthening of the human right to food through the use of organic waste in home gardens in the municipality of María La Baja - Bolívar.</p>	<p>1.) The Ministry of Environment and Sustainable Development will be responsible for monitoring the implementation of the initiative, with the support of the working group</p>	<p>1.) Technical support is required from the working group, with experience in sustainable food systems with a focus on production for self-consumption.</p>	<p>Ministry of Environment and Sustainable Development; municipality of María La Baja - Bolívar</p>	<p>https://portalsuin.icbf.gov.co/sites/suin/Documentos/fichas%20populacionales/Bolivar.pdf</p>
	<p>Implementation of a program for the recovery of organic solid waste in the municipality of Nuquí - Chocó: Implement the valorization of organic solid waste generated in the urban area of the Nuquí - Chocó municipality, based on the existing community organization, reducing the environmental impact caused by inappropriate waste management, promoting their domestic use, boosting the popular economy and contributing to the food security of families.</p>	<p>1.) Promote the use of products obtained from the recovery of waste in agricultural food production 2.) Replicate initiative in other municipalities in the country under similar conditions, configuring it as a national strategy 3.) A work plan will be formulated, detailing the milestones, goals and timetable of the project, the financial amounts, and the technical, infrastructural and administrative support necessary for its development. 4.) Establish route and conditions of participation of the parties, taking into account investments from the cooperation, counterparts and the municipality's own resources. 5.) Create the necessary partnerships for the development of the project, which may be framed in a memorandum of understanding or a local agreement.</p>	<p>1.) Support from the working group is needed to provide technical assistance on issues like strengthening community organizations and effectively recovering organic materials from domestic sources for agronomic waste recovery processes. 2.) Technical resources for the definition and implementation of an administrative and financial scheme for the project that guarantees its sustainability over time 3.) Financial resources are also required for the implementation and monitoring of the project.</p>	<p>Municipality of Nuquí - Chocó; families</p>	
	<p>Development of conservation strategies and participatory urban-regional environmental management in the cities of the Colombian Amazon: Leticia, Puerto Nariño, Inírida and Mitú. - Amazonian Cities: Aims to be implemented in the cities of the Colombian Amazon and is framed within the articulation of the Ministry of Environment and Sustainable Development with the entities of the National Environmental System (SINA).</p>	<p>1.) Develop conservation strategies and participatory urban-regional environmental management in the cities of the Colombian Amazon 2.) Increasing restoration initiatives of urban and peri-urban strategic environmental areas and their ecosystem services. 3.) Carry out economic development actions based on urban and peri-urban biodiversity. 4.) Strengthen environmental governance for conservation and urban-regional environmental management in Amazonian cities and their strategic environmental areas. 5.) Develop outreach and monitoring strategies for urban-regional environmental conservation and management in Amazonian cities and their strategic environmental areas.</p>	<p>1.) Provide the working group with technical support in biodiversity and climate change to optimize the formulation of the project and assist in defining an appropriate budget and securing financing.</p>	<p>Cities of the Colombian Amazon: Leticia, Puerto Nariño, Inírida and Mitú; Ministry of Environment and Sustainable Development</p>	
Dominican Republic	<p>Oportunidad 14-24: Promote the socio/labor reintegration of youth through socio-educational solutions, assistance schemes and the development of human-social capital.</p>	<p>1.) Provide access to education, employment and social support to youth</p>		<p>youth</p>	
	<p>Programa Agricultura Familiar: • Families participating in social assistance from the Dominican Government with interest in farming activities. • Program targets families with socioeconomic vulnerability, inhabitants in rural or marginalized areas</p>	<p>1.) Collaboration agreement with the Embassy of England to develop the project to reduce water consumption, for efficient and responsible use of this resource. 2.) Strengthen the local economy, and promote sustainable agricultural practices.</p>		<p>Dominican Government;</p>	
	<p>Iniciativa para la Transparencia y Acción Climática: Strengthen national capacity to monitor and evaluate effective and efficient climate change adaptation actions .</p>	<p>1.) Monitoring and evaluation (M&E) system that allows measuring interventions linked to mitigation and adaptation to climate change. 2.) Developing and testing tools, indicators and methodologies to evaluate adaptation actions and policies in the agriculture and tourism sectors.</p>		<p>agriculture and tourism sector; National Council for Climate Change</p>	
	<p>SIRED-RD: • Advanced tool that effectively systematizes information on direct economic losses caused by different disruptive events. • Part of the digital information ecosystem for disaster risk management and climate actions at the national level.</p>	<p>1.) Provide agile and timely information, in real time, on the economic damage caused by storms and hurricanes.</p>		<p>Ministry of Economy, Planning and Development</p>	
	<p>Evaluación del Desempeño Institucional: • Optimising public administration by promoting a culture of accountability. • Encouraging transparent management of resources and administrative processes in a transparent</p>	<p>1.) Improve public management through feedback and organizational learning. 2.) Promote institutional strengthening and ensure linkage in evaluations of the institutional and work performance. 3.) Improve the measurement of the delivery of goods and services of public institutions and their management. 4.) Increase the number of performance agreements that serve as a basis for the Evaluation of Institutional Performance.</p>		<p>public institutions; Ministry of the Presidency; Ministry of Public Administration; Ministry of Economy, Planning, and Development</p>	
	<p>Programa Burocracia Cero: Hacia un Gobierno Eficiente : Main component projects of the Digital Government, of the Digital Agenda 2030. Aims to offer more efficient services to citizens by simplifying administrative procedures and digitizing public services</p>	<p>1.) Increase use of technologies for the automation and digitization of public procedures and services, with a view to promote the efficiency of the Public Administration 2.) Improve government efficiency and facilitate the creation and operation of local companies</p>		<p>Digital Government; local companies; citizens; Ministry of Public Administration</p>	

SDG-related Initiatives Led by Member States: National Focus/Impact

	<p>Marco Nacional Integrado de Financiación para el Desarrollo: National instrument that will allow identifying the sources and resources of financing national development. Consists of strategic planning tools to finance sustainable development, SDGs and national development instruments.</p>	<ol style="list-style-type: none"> Facilitates the coordination and alignment of both internal and external financial resources towards national development priorities. Improve the link between development planning and financing. Strengthen the monitoring of financial flows for development of financial flows for development. Create strategies to finance development and mobilize additional resources. Have a set of instruments that guide development financing. 	national government; Ministry of Economy, Planning and Development		
	<p>RD Trabaja (Programa de Empleabilidad Juvenil): Facilitate young people's access to their first formal job.</p>	<ol style="list-style-type: none"> Offers guidance and support so that young people can develop the skills necessary to perform successfully in the workplace. Establish incentives for companies that hire young people without previous work experience, which stimulates employment opportunities for this demographic group. Participation of women and single mothers and the inclusion of people with disabilities, so that they acquire work experience under the form of Training for Labor Insertion in Formal Companies. 	women; formal companies; people with disabilities; Ministry of Employment		
	<p>Raising Jordan NDCs ambitious to 31% by 2030: Aligning with Jordan's Economic Modernization Vision, The objectives and targets of Jordan's revised NDC are being aligned with the Long-Term Strategy (LTS) that the Government of Jordan is recently developed in the form of a new climate change policy for 2050 that provides guidance to build a climate resilient society that aims to be part of the global movement that aspires to reach carbon neutrality by 2050 in alignment with the objectives set under Jordan's EMV and UNFCCC. Guided by the newly adopted Economic Modernization Vision and its Economic Modernization Plan 2023-2025, this commitment/initiative aims at combating climate change and accelerating the transition to a climate- resilient, low-carbon sustainable mode of development, more than doubling its climate commitments from reducing the 14% (2016) to 31% (2021) macroeconomic GHG emissions compared to BAU by 2030.</p>	<ol style="list-style-type: none"> Lead the process of NDC preparation and follow up its implementation including the sectoral measures Coordination and harmonization modalities and mechanisms including the stakeholder consultations conducted through the working groups established by the Bylaw The government plans to contribute about USD Million 565 from national resources. Strengthening the public financing institutions Periodically share reports publicly on the progress update of the achievements, challenges and lessons learned Monitor initiative through the ministry's tracking mechanism MRV, and progress will be included in the national communication reporting. 	<p>1) Ministry of Environment is the chair of the National Climate Change Committee which consists of the 16 secretary generals from the line ministries. And pursuant to the provisions of this bylaw, Ministry of Environment is entitled to lead the process of NDC preparation and to follow up its implementation including the sectoral measures. This initiative will benefit from the existing coordination and harmonization modalities and mechanisms including the stakeholder consultations conducted through the working groups established by the Bylaw comprising representatives from relevant sectoral agencies, academia, NGOs and the private sector in a gender-responsive manner. Technical support e.g. build capacity of the Statistical Department and focal points from relative line ministries to track the NDC implementation; improve stakeholder's skills in preparing full proposals ready to be submitted to international climate-funds and assessing the level of engagement of the local private sector and financial institutions in NDC implementation.</p> <p>2) Finance: Coordinating government efforts and resources for maximization of quality and strategic objectives related to different climate programs while aligning to government priorities; developing a common roadmap and timeframe for efficient partner coordination on NDC implementation.</p>	sectoral ministries, institution, private sector, NGOs, and other relevant stakeholders	https://www.moenv.gov.jo/Default/En
	<p>Transforming education in Jordan through inclusive, quality and responsive education delivery for all children and youth: Aims to enhance the access and retention to quality education, from early childhood until tertiary education, including TVET, for all children and youth in Jordan</p>	<ol style="list-style-type: none"> Increase KG2 enrollment for all children in Jordan Ensure all public schools in Jordan have the necessary resources and training opportunity to impact student progress and performance Improve professional development mechanisms for pre-service and in-service teachers, as well as workers in the public education sector Increase vocational education enrollment increased Launch a global platform at the SDG Summit and utilise the platform to report on and monitor the programme benchmarks and outcomes. 	<ol style="list-style-type: none"> Financing in USD 1.2 billion JOD Technical Assistance & Expertise 250 million JOD In-Kind Contribution 	Teachers; workers; students	https://moec.gov.jo/
