# AIDS is not over, but it can be

Huge progress has been made since 2000 and millions of lives have been saved. But there are still important milestones to reach, barriers to break and frontiers to cross. The world has agreed to meet a set of global targets by 2020 as part of UNAIDS Fast-Track strategy to end the AIDS epidemic as a public health threat.

## People living with HIV on antiretroviral therapy

2000                  June 2016                  2020 target

## New HIV infections

2000                  2015                  2020 target

## New HIV infections among children

2000                  2015                  2020 target

## AIDS-related deaths

2000                  2015                  2020 target

# AIDS is not over, but it can be

## Tuberculosis-related AIDS deaths

## Total voluntary medical male circumcisions (14 priority countries in Africa)

## Condoms procured

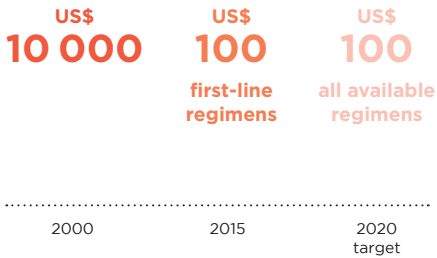

## Number of pills to treat HIV

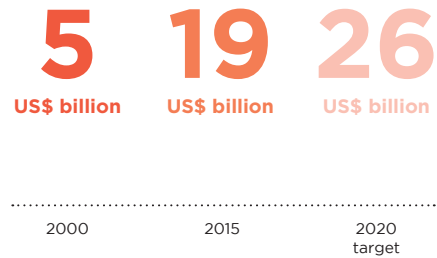

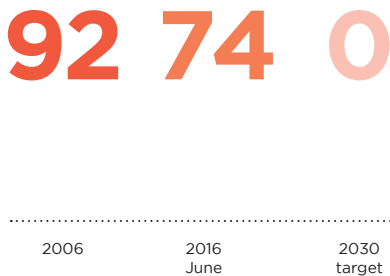

### Cost of antiretroviral medicines per person per year

### Investments for the AIDS response

### Countries that criminalize same-sex sexual relationships

### HIV-related travel restrictions

July 2016  
Core epidemiology slides

# Global summary of the AIDS epidemic | 2015

## Number of people living with HIV

Total	36.7 million [34.0 million–39.8 million]
Adults	34.9 million [32.4 million–37.9 million]
Women	17.8 million [16.4 million–19.4 million]
Children (<15 years)	1.8 million [1.5 million–2.0 million]

---

## People newly infected with HIV in 2015

Total	2.1 million [1.8 million–2.4 million]
Adults	1.9 million [1.7 million–2.2 million]
Children (<15 years)	150 000 [110 000–190 000]

---

## AIDS-related deaths in 2015

Total	1.1 million [940 000–1.3 million]
Adults	1.0 million [840 000–1.2 million]
Children (<15 years)	110 000 [84 000–130 000]

## Global estimates for adults and children | 2015

**People living with HIV**

36.7 million [34.0 million–39.8 million]

---

**New HIV infections in 2015**

2.1 million [1.8 million–2.4 million]

---

**AIDS-related deaths in 2015**

1.1 million [940 000–1.3 million]

## **About 5700 new HIV infections (adults and children) a day | 2015**

- **About 66% are in sub-Saharan Africa**
- **About 400 are among children under 15 years of age**
- **About 5300 are among adults aged 15 years and older, of whom:**
  - almost 47% are among women
  - about 35% are among young people (15–24)
  - about 20% are among young women (15–24)

## Global estimates for children (<15 years) | 2015

**Children living with HIV** 1.8 million [1.5 million–2.0 million]

**New HIV infections in 2015** 150 000 [110 000–190 000]

**AIDS-related deaths in 2015** 110 000 [84 000–130 000]

# Global HIV trend data in 2015

Number of people living with HIV—global

Number of children living with HIV—global

Number of AIDS-related deaths—global

Number of new HIV infections—global

Number of orphans due to AIDS—global

# Global HIV data in 2015

	2000	2005	2010	2011	2012	2013	2014	2015/(*2016)
People living with HIV	<b>28.9 million</b> [26.5 million– 31.7 million]	<b>31.8 million</b> [29.4 million– 34.5 million]	<b>33.3 million</b> [30.8 million– 36.1 million]	<b>33.9 million</b> [31.4 million– 36.7 million]	<b>34.5 million</b> [31.9 million– 37.4 million]	<b>35.2 million</b> [32.6 million– 38.1 million]	<b>35.9 million</b> [33.3 million– 38.9 million]	<b>36.7 million</b> [34.0 million– 39.8 million]

Source: UNAIDS 2016 estimates.

# Distribution of new adult HIV infections and population by age and sex, global and in sub-Saharan Africa, 2015

**NEW HIV INFECTIONS AMONG ADULTS, BY AGE AND SEX, GLOBAL, 2015**

**ADULT POPULATION, BY AGE AND SEX, GLOBAL, 2015**

**NEW HIV INFECTIONS AMONG ADULTS, BY AGE AND SEX, SUB-SAHARAN AFRICA, 2015**

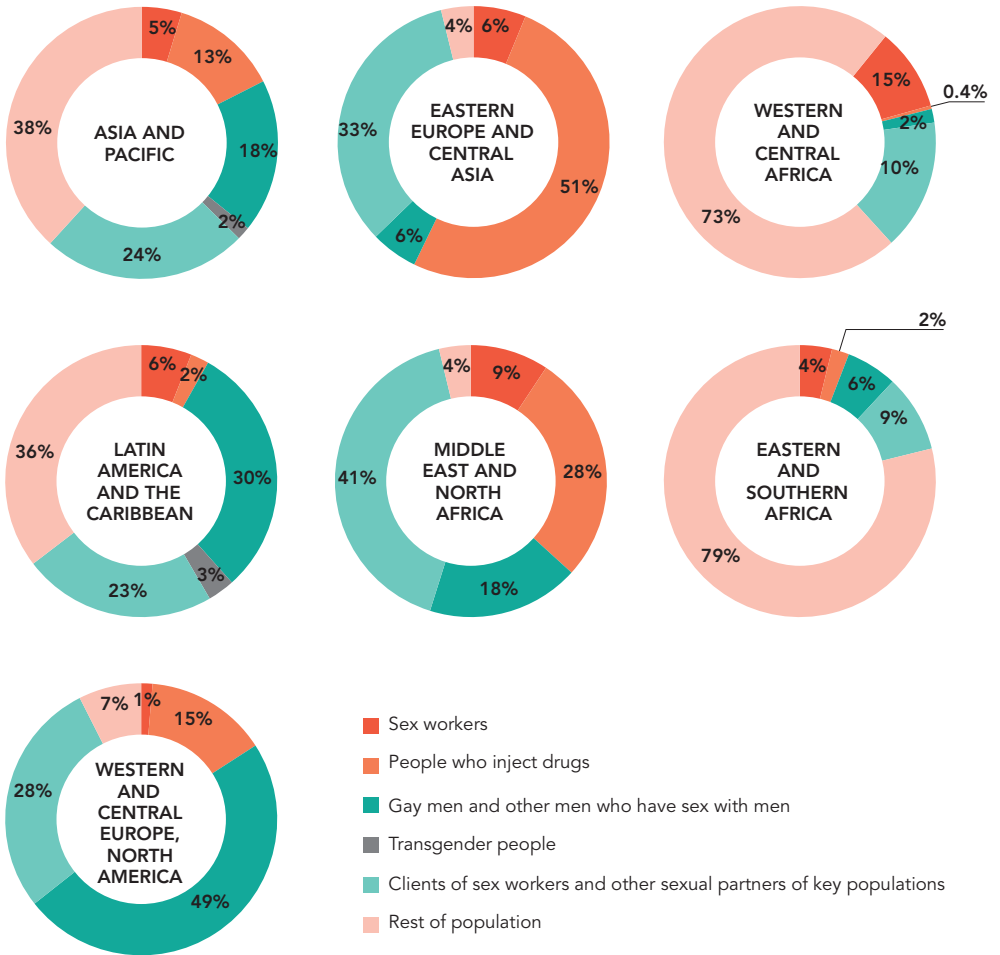

**ADULT POPULATION, BY AGE AND SEX, SUB-SAHARAN AFRICA, 2015**

Source: UNAIDS 2016 estimates.

# Distribution of new HIV infections among population groups, by region, 2014

Source: UNAIDS special analysis, 2016.

Methodological note: Estimated numbers of new HIV infections by key population were compiled from country Spectrum files submitted in 2015 to UNAIDS (2014 data), available modes-of-transmission studies and additional sources of data drawn from GARPR reports. Where data were lacking, regional medians were calculated from available data and applied to countries' populations.

The data provided in this document are just a sample of the data available from UNAIDS.

Additional data are available at [aidsinfo.unaids.org](https://aidsinfo.unaids.org), including:

- Additional Global AIDS Response Progress Reporting Indicators on prevention, mother-to-child transmission, 90–90–90 targets, stigma and discrimination
- A **Key Population Atlas** of maps on key populations, including the latest available data on key populations at increased risk of HIV infection.
- Estimates of new HIV infections, people living with HIV and AIDS-related deaths by different **age groups**, children (age 0–14 years), adolescents (age 10–19 years), young people (age 15–24 years), adults (age 15–49) older people (age 50 years and over), and **by sex**
- **Subnational** data for selected countries
- Data in different formats: spreadsheet, maps, graphics
- Comparable data over **multiple years**, and across countries, which can also be extracted to spreadsheets for further analysis.
