CONTENTS

	Preface	vii
1	Object-oriented transformation *Kenneth Baclawski, Scott A.DeLoach, Mieczyslaw M.Kokar, Jeffrey Smith*	1
2	Being served: The purposes, strengths and limitations of formal service modelling *Bernard Cohen*	15
3	What vs. how of visual modeling: The arrow logic of graphic notations *Zinovy Diskin, Boris Kadish, Frank Piessens*	27
4	Meta-modelling semantics of UML *Andy Evans, Robert France, Kevin Lano, Bernhard Rumpe*	45
5	Combining JSD and Cleanroom for object-oriented scenario specification *Marc Frappier, Richard St-Denis*	61
6	What is behind UML-RT *Radu Grosu, Manfred Broy, Bran Selic, Gheorghe Stefanescu*	75
7	Applying ISO RM-ODP in the specification of CORBA® interfaces and semantics to general ledger systems *Jack Hassall, John Eaton*	91
8	Component-based algebraic specification *Shusaku Iida, Kokichi Futatsugi, Razvan Diaconescu*	105
9	A meta-model semantics for structural constraints in UML *Stuart Kent, Stephen Gaito, Niall Ross*	123
10	On the structure of convincing specifications *Haim Kilov, Allan Ash*	141

11 Formalising the UML in structured temporal theories
Kevin Lano, Juan Bicarregui 161

12 JML: A notation for detailed design
Gary T. Leavens, Albert L. Baker, Clyde Ruby 175

13 Agents: Between order and chaos
James J. Odell 189

14 UML, the future standard software architecture description language?
Andy Schürr, Andreas J. Winter 195

15 Using information modeling to define business requirements
Mark A. Shafer 209

16 A layered context perspective on the design of enterprises and information systems
Ian *Simmonds, David Ing* 219

17 30 Things that go wrong in object modelling with UML 1.3
Anthony J H Simons, Ian Graham 237

18 Formalizing association semantics in terminologies
Harold Solbrig 259

19 On the specification of the business and economic foundations of electronic commerce
Angelo E. Thalassinidis, Ira Sack 271

20 Embedding object-oriented design in system engineering
Roel Wieringa 287

Index 311
